TECHNICAL INFORMATION BULLETIN
FOR THE USE OF Venerate XC® BIOINSECTICIDE
Obliquebanded leafroller and Pandemis leafroller on Pome Fruit

FIFRA Section 2(ee) Recommendation
This recommendation is made as permitted by Section 2(ee) of FIFRA, as amended, and has not been submitted to or approved by the U. S. Environmental Protection Agency.

FOR USE IN ALL STATES WHERE CROP AND PEST(S) EXIST AND WHERE 2(EE) RECOMMENDATIONS ARE RECOGNIZED.

Venerate XC®
EPA Reg. No. 84059-14

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Crop	Target Insect	Application Method	Product Use Rate per Application	Application Instructions
Pome fruit (apples, crabapple, loquat, mayhaw, pears and quince)	Obliquebanded leaf roller Pandemis leafroller	Foliar (Ground application) in a minimum of 50 gallons of water per acre	2-4 quarts per acre	Careful attention to the leafroller life cycle is required for successful control. Obliquebanded leafroller and pandemic leafroller overwinter as second instar larvae and become active by half-inch green tip where they become susceptible to insecticides. There are two summer generations and applications should be timed for egg hatch for maximum control.
Venerate XC ® has a **pre-harvest interval (PHI)** of **0 days**. Do not enter or allow worker entry into treated areas during the **restricted-entry interval (REI)** of **4 hours**.				

All applicable directions, restrictions and precautions on the EPA-registered label are to be followed.

This FIFRA Section 2(ee) recommendation contains new or additional directions for use of this product, which may not appear on the package label. Read and carefully observe the cautionary statements plus all the other information appearing on the product label.

This recommendation must be in the possession of the user at the time of pesticide application.
