**Square Feet:** 1,100

Project Size: \$724,658

Start Date: 1/19/2015

Completion Date: ???

**Architect:**

Eric Keyes- TVCE

## PROJECT OVERVIEW

Hoopa Forest Industries is owned and operated by the Hoopa Valley Tribe. Harvesting up to 9 million board feet of timber a year there facility provides a number of jobs and brings in a substantial amount of income for the tribe. Due to fire damage the existing mill building was in need of major repair. Some of those repairs included a

new roof, wall panels and two roll up doors. Along with these repairs additional buildings, an office building with a break room and restroom, were built. The updated facility allows HFI to continue there work smoothly with more efficiency and comfort for employees.

## PROJECT HIGHLIGHTS

-Both the mill building and office building are equipped with full sprinkle systems to prevent further fires. The mill runs on a dry system and the office on a wet system.

-Both the office building and restroom are ADA accessible.
