

## Falcon is turning the page to the next chapter in the life of CALIDUS Ultrafast Gas Chromatography.

Teledyne Falcon will now be an important part of **Teledyne Technologies**. Teledyne Technologies Incorporated provides enabling technologies for industrial growth markets that require advanced technology and high reliability.

Teledyne's user markets include instrumentation, aerospace and defense, factory automation, air and water quality environmental monitoring, electronics design and development, oceanographic research, deep-water oil and gas exploration and production, medical imaging, and pharmaceutical research.

The Teledyne Falcon story began when Teledyne was attracted to Falcon Analytical because of our extraordinary, patented **CALIDUS™ Ultrafast Gas Chromatograph**. Our installed base of more than 60 blue chip companies, in more than 25 countries, serving lab, online, at line and transportable GC users also caught the attention of the professionals at Teledyne.

As the Teledyne Falcon story unfolds we will have an even greater global sales, service, support, engineering and manufacturing capacity. We will be better able to meet the most demanding requirements in all these critical functions.

And, as we turn the page on this new chapter, you can also expect true continuity from Teledyne Falcon. After a conscientious transition process, Teledyne Falcon operations will move to the Teledyne Analytical division headquarters, in Englewood, Colorado U.S.A. All commitments to present customers and distributors will continue uninterrupted.

You can also expect to see continuity with our email newsletters. We will continue to write about our progress in the world of Ultrafast Gas Chromatography and about other important developments at Teledyne Falcon.

Perhaps most importantly, Teledyne Falcon will now be the makers of the ultrafast, ultra-user-friendly, highly durable, practical, reliable, versatile and economical CALIDUS Ultrafast Gas Chromatograph.

Unique GCs, that are 10 to 50 times faster than traditional GC analyzers will continue to be available, along with our **PALARUS™ and TALON™ GC Autosamplers**, and our outstanding customer service and support.

Thank you for all the support you have shown to Falcon Analytical. We look forward to working with you as Teledyne Falcon. If you have questions or concerns about our transition to Teledyne Falcon, please contact us using the details below.
