Dear Mr. Ketcham:

Enclosed you will find corrected measurement certificate for boat #2537. I have rechecked this boat and was sorry to find two errors which were my own. In regard to half breadths at station # 6, I discovered an error in division thus making this station $34\frac{1}{2}$ " at the deck and $27\frac{1}{2}$ " at the chine.

Regarding the stern, I discovered that I measured at station #10 at the deck instead of the stern. This measurement is now $20\frac{5}{8}$ " at the deck and $15\frac{1}{4}$ " at the chine, although I notice that this stern is much wider than any of the other boats I have measured.

In remeasuring the jib stay, the best figure I could arrive at was 21'9" measuring from point B.

In regard to the two certificates #2577 and #2578. The keels on both these boats were moved forward to the measurement given and the chines were planed off and rounded so that they would just measure in as reported.

I have tried to be just as careful as possible in measuring the boats but sometimes no matter how careful one is bound to make a mistake.

Very truly yours,

Chris Gasparich
