

Enjoying the Beckman Lounge when attending an event is a valuable benefit.

But you can have a greater impact.

Your donation will bring middle and high school students to campus for Reel Science events. We hear from students who, after attending these events, tell us they were inspired to pursue an interest in science by the young scientists who lead the discussions.

Attending a Watson Lecture in the reserved seating section is a valuable benefit.

But you can have a greater impact.

Your donation will bring high school students to campus for the Jr. Watson program. These students receive private lab tours, in which they have the opportunity to engage in conversation with the scientists who are on the cutting edge of Caltech's research.

Friends having their own entrance to Beckman Auditorium is a valuable benefit.

But you can have a greater impact.

Your donation will bring elementary and middle school students to world-class performing arts events. Young students can be seen singing and dancing after experiencing the music and dance from cultures around the world.

Caltech & The Community

California's public schools continue to fall behind in providing quality science education and have all but discontinued arts education from the curriculum. Private institutions, like Caltech, have stepped in to enhance educational opportunities in the arts and sciences.

As the preeminent institution in our community, we take very seriously our responsibility to inspire, challenge and prepare the next generation. When you become a Friend of Beckman Auditorium, you are saying that science education and arts education matters to you. Your donation is used to help fund our K-12 educational outreach programs:

Junior Watson program—Interested and talented science high school students, identified by their teachers, are invited to participate in a private lab tour with selected lecturers from the Earnest C. Watson Lecture Series. Following the lab and campus tours, students are treated to dinner with members of the lab group, and then attend the Watson Lecture in Beckman Auditorium.

School Day programs—Each year, a number of events are scheduled for school field trips. These 1-hour performances are held in Beckman Auditorium during school hours, and are presented by Caltech Presents.

Performing Arts Events—Abbreviated versions of some of our full evening performances by renowned performers.

Reel Science Events—A series of science programs featuring high definition movies, followed by discussions with Caltech scientists.

Friends of Beckman Auditorium

Friends of Beckman Auditorium was started in 1967, by Caltech faculty who were also performing arts enthusiasts. Their original purpose was to provide funding for artists' fees to attract high-caliber performance groups. As membership grew, the Friends of Beckman Auditorium became the driving force behind Caltech Presents' educational and community outreach programs.

Friends of Beckman Auditorium Membership Levels

| | \$100 Curiosity | \$250 Exploration | \$500 Discovery | \$750 Transformation | \$1000 Zenith |
|--|-----------------|-------------------|-----------------|----------------------|---------------|
