

Triple 10 Plus

A Liquid 10-10-10 with 6 Micronutrients

Triple 10 PLUS is formulated to provide a complete and balanced NPK nutrient package with multiple micronutrients to help improve nutrient balance and increase yield.

Formulated with Fulvic Acid, which helps increase nutrient uptake.

Fulvic Acid is rapidly absorbed by plants, acting as a catalyst in plant respiration, stimulating metabolism.

Unlike many bagged dry soluble powders, Triple 10 PLUS is pH neutral. You don't need to worry about dropping the pH of your spray solution too low for some pesticides. AND no need to break bags anymore!
