FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF IDAHO

AAtrex® Nine-O®

For Control of Annual Weeds in Summer Fallow In Idaho

**EPA Reg. No. 100-585
EPA SLN No. ID-830009**

This label expires and must not be distributed or used in accordance with this SLN registration after December 31, 2019

DIRECTIONS FOR USE

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This label must be in the possession of the user at the time of application.
- Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA-registered label.
- **FAILURE TO FOLLOW THE DIRECTIONS FOR USE AND PRECAUTIONS ON THIS LABEL MAY RESULT IN POOR WEED CONTROL, CROP INJURY, OR ILLEGAL RESIDUES.**

For control of downy brome (cheatgrass), mustards, and volunteer grain on land to be summer fallowed and planted to winter wheat, apply 0.44 lb/A of AAtrex Nine-O plus a registered, postemergence, chemical fallow herbicide to stubble following fall rains, after volunteer grain has begun growth (but not later than February 1). If weeds germinate in the spring, they should be controlled with stubble-mulch tillage.

DO NOT make a second application. **DO NOT** plant spring cereals; follow only with winter wheat.

Observe all directions, limitations, and precautions on the label of any product used in a tank mix combination with AAtrex.

Precautions: 1) Use only on the Panhandle of Idaho, north of Grangeville. 2) Avoid overlapping. 3) Use only on silt loam or finer textured soils. 4) **DO NOT** graze treated areas within six months after application.

Chemigation: **DO NOT** apply this product through any type of irrigation system.
