

ACHA

All Compatible Humic Acid

0-0-1

Guaranteed Analysis:

Soluble Potash (K₂O).....1.0%

Derived from potassium hydroxide and fermented grain by-products

ALSO CONTAINS NON-PLANT FOOD INGREDIENTS:

1.5% Humic Acid

Derived from Leonardite

WARNING

HAZARD STATEMENT

H302: Harmful if swallowed.
H315: Causes skin irritation.
H318: Causes serious eye irritation.

PRECAUTION STATEMENT

Do not eat, drink or smoke when using this product.
Wear protective gloves/protective clothing/eye protection.
Wash skin thoroughly after handling.

REFERENCE: SDS0032.03

GENERAL INFORMATION: ACHA is humic acid that is compatible with most fertilizers, providing convenience as well as a synergistic effect. Blend ACHA with a fertilizer when soil salts are high. It is intended to be a supplement to a fertility program. Always monitor crop nutrient needs and responses with a soil, leaf tissue and irrigation water analysis program.

DIRECTIONS FOR USE

This product is not intended for foliar applications.

APPLICATION GUIDELINES:

ACHA should always be applied in combination with acid, neutral or alkaline soil minerals and fertilizers, for soil or water run application. It is recommended to flush the irrigation system with clean water for one hour prior to system shut down. Use caution in application to assure coverage on intended treatment areas only.

PRECAUTIONS:

Since many pesticide products can be neutralized and/or tied up by soil organic matter, it is highly recommended not to use pesticides applied directly with humic acids. Consult pesticide representative before using on a large scale. ACHA is not intended for foliar applications on food crops. Avoid contact with fruit and produce intended for human consumption. It is recommended to shake, stir or agitate containers or tanks prior to use.

MIXING DIRECTIONS:

ACHA should be blended with an acid, neutral or alkaline fertilizer.

COMPATIBILITY:

ACHA has a mildly acidic pH and is compatible with most acidic, neutral and alkaline fertilizers and many commonly applied nutrients and crop protection products. It is suitable for blends with calcium containing products. Contact a Source to Source representative for a list of compatible mixes. Jar test for compatibility prior to mixing with any pesticides, fertilizers or fertilizer blends. For unfamiliar mixes, an appropriate amount of the final mix should be applied to a small area of the intended crop to ensure plant compatibility prior to the planned application. User assumes full responsibility to ensure product, equipment and plant compatibilities.

When blending humic acids with an acid based fertilizer, the humic acid will be in a stable suspension. The beneficial active ingredients are still present in an acidic form, but the CDFA humic acid testing method does not test for humics in suspension. When blending ACHA with acid fertilizers, do not include humic acids as part of the guaranteed analysis.

STORAGE AND DISPOSAL:

Store in a sealed container in cool, dry location, at temperatures above freezing. Triple rinse and dispose of containers according to local and federal regulations.

SUGGESTED APPLICATION RATES & TIMINGS

The mix rate percentage should be determined by the salinity of the field. Blend 2%-50% (by volume) ACHA with fertilizer. Typical application rate is 2-5 gallons per acre, per application. Typical application total per acre, per season, should range from 2 gallons to 30 gallons.

CAUTION: KEEP OUT OF REACH OF CHILDREN.

NOTICE: Seller warrants that this product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use. Buyer shall assume all risks of use including, but not limited to crop injury, ineffectiveness or other unintended consequences as may result because of such factors as weather conditions, presence of other materials or the manner of use or application, all of which are beyond the control of the seller. In no case shall Source to Source be liable for consequential, special or indirect damages resulting from the use or handling of this product.
