GENERAL INFORMATION

AMSOL PLUS is a liquid ammonium sulfate complex with a built in drift reduction agent* that improves spray deposition. AMSOL PLUS can be used with any herbicide to increase performance through:

- Controlled droplet size
- Increased absorption into the plant's phloem through the leaf cuticle
- Increased retention on leaf surface
- Decreased herbicide antagonism due to calcium ion mineralization

**Spray drift reduction is dependent on many factors including equipment setup and weather conditions. For proper management of spray drift and spray deposition, all factors, including the condition and settings of the equipment and wind speed and direction, humidity and temperature must all be taken into account.*
