GENERAL INFORMATION

AVAIL HV FOR LIQUID PHOSPHATE FERTILIZERS is designed to be mixed into liquid phosphate fertilizers (i.e., 10-34-0 and other liquid phosphate fertilizers) where single application volumes of phosphate fertilizer exceed 15 gallons per acre. AVAIL HV sequesters antagonistic metals in the soil in the vicinity of the applied phosphate, reduces tie-up of phosphate, and makes phosphate more available to the plant. AVAIL HV increases phosphate availability through all stages of plant growth, including the early developmental period crucial for increasing yield potential. AVAIL HV is water soluble, biodegradable, and nontoxic. AVAIL HV FOR LIQUID PHOSPHATE FERTILIZERS may be used with fall or spring fertilizer applications.

AVAIL HV FOR LIQUID PHOSPHATE FERTILIZERS IS A NON-PLANT FOOD INGREDIENT, AND NOT RECOMMENDED FOR USE AS A FERTILIZER SUBSTITUTE.

APPLICATION RATES

AVAIL HV treated phosphate fertilizer should be applied to the soil in the same manner as phosphate fertilizers without AVAIL HV.

NOTE: When using AVAIL HV, if different farming methods from those normally used are tried, test strips are recommended until such new methods have been proven to be effective.

SOIL TYPES AND CROPS

AVAIL HV is designed to reduce fixation of high volume phosphate fertilizers in any soil type and to be used ONLY with the listed crops where single application volumes are equal to or exceed 15 gallons per acre of phosphate fertilizer.

Approved crops for use:

- Potatoes (*Solanum* spp. ONLY)
- Onions
- Hay/forage/alfalfa
- Solanaceous crops
- Fruits, Vines, Nuts
- Row Vegetables
- Cucurbits

MIXING RATE OF AVAIL FOR LIQUID PHOSPHATE FERTILIZERS

AVAIL HV FOR LIQUID PHOSPHATE FERTILIZERS is recommended for use at a rate of 0.5% (0.5 gallons of AVAIL HV with 99.5 gallons of liquid tank mix). AVAIL HV concentration needs to be 0.5% of total tank mix.

MIXING INSTRUCTIONS

To test compatibility of AVAIL HV FOR LIQUID PHOSPHATE FERTILIZERS with pesticides, surfactants and other products, a proportional mixture of AVAIL HV (Using Mixing Rates stated on the Label), liquid phosphorus fertilizer and the other products to be tested should be mixed in a jar or beaker, prior to adding AVAIL HV or liquid phosphate fertilizer containing AVAIL HV

to an entire tank mix. AVAIL HV should only be added to the liquid tank mix after the liquid phosphorus fertilizer has been added.

"316" stainless steel pumps and attachments are recommended. When seals are used, seals made of "Gore-tex", "Teflon" or "Viton" are required.
