

EPA REG. N.º: 91473-1-86182

TECHNICAL INFORMATION AND INDICATIONS ON TANK MIXING

This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by the U.S. Environmental Protection Agency.

All applicable directions, restrictions, and precautions on the EPA-registered label are to be followed. This FIFRA Section 2(ee) recommendation contains new or additional directions for use of this product, which may not appear on the package label. Read and observe the cautionary statements plus all other information appearing on the product labels. **The user must have these recommendations in their possession at the time of pesticide application.**

It is a violation of federal law to use this product in a manner inconsistent with its label.

Tank Mixing

SEIPASA S.A. supports the mixing of AVIV™ with the following products, whose compatibility has been tested. AVIV can be mixed and used with other agricultural chemicals in accordance with the most restrictive of those label limitations and precautions. If such a mixture is planned, a compatibility “jar test” should first be conducted by mixing the correct proportions of AVIV and these products in a small volume of water. AVIV has been shown to be compatible with multiple mixes.

The recommendations of these tables are the result of physical compatibility tests, but these tests do not check for any adverse crop phytotoxicity or for the biological efficacy of the individual components when applied in a tank-mix. The use of any tank mixture of AVIV with any other product is at grower’s own risk. SEIPASA gives no warranty and accepts no liability in respect of physical compatibilities.
