

FIFRA

Section 2(ee) Recommendation

Date: January 5, 2021

Product: Acuron® Herbicide
EPA Reg. No. 100-1466

Use: Tank Mixture Recommendation for Postemergence Control of Broadleaf Weeds
in Field Corn

State: Oklahoma

Directions for Use

- **It is a violation of Federal law to use this product in a manner inconsistent with its labeling.**
- **The user must refer to the federally approved labels for the above noted product and read and follow all directions for use, restrictions, and precautions.**
- **The user should have this recommendation in its possession at the time of use.**
- **This recommendation for use of this product is permitted under Section 2(ee) of FIFRA and has not been submitted to or been approved by EPA.**

Tank mix Acuron Herbicide at 1.25 to 2.5 qt/A + Peak at 0.5 to 0.75 oz./A + nonionic surfactant-(NIS) at 1 qt/100 gal + spray grade ammonium sulfate-(AMS) at 8.5 lb/100 gal for improved broadleaf weed control as a postemergence spray in field corn.

In glyphosate tolerant field corn only, a solo glyphosate product may also be added to this tank mixture. If the glyphosate product has a built-in adjuvant system (i.e. the product label does not ask for additional NIS), only AMS at 8.5 lb/100 gal should be added to this mixture.

Refer to the Acuron Herbicide, Peak, and solo glyphosate labels for specific use rates and directions, restrictions and precautions..
