

Section 2(ee) Recommendation

Date: June 4, 2021

Product: Agri-Mek® SC Miticide/Insecticide
EPA Reg. No. 100-1351

Use: For control of false spider mite (*Brevipalpus* sp.) in citrus

State: FL

Directions for Use

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- The user must refer to the federally approved labels for the above noted product and read and follow all directions for use, restrictions, and precautions.
- The user should have this recommendation in its possession at the time of use.
- This recommendation for use of this product is permitted under Section 2(ee) of FIFRA and has not been submitted to or been approved by EPA.

Agri-Mek SC Miticide/Insecticide will provide control of false spider mite (*Brevipalpus* sp.) in citrus when applied at the rate of 4.25 fl. oz/A. Apply when mites first appear.

To avoid illegal residues Agri-Mek SC must always be mixed with a non-phytotoxic, non-ionic activator type wetting, spreading, and/or penetrating spray adjuvant or horticultural oil (not a dormant oil) and applied as specified in the Citrus Crop Use Directions section of the Agri-Mek SC Section 3 label.

Thorough coverage is essential to obtain best results. Select a spray volume and spray pressure for the size of the trees and density of the foliage to ensure thorough spray coverage.

Apply this product diluted in a minimum volume of 25 gal/A by ground application. Under conditions such as high pest populations, dense foliage, or adverse application conditions (such as high temperatures), use a greater volume of water to ensure adequate coverage.

Do not apply by air for control of false spider mites (*Brevipalpus* sp.).
