

ALTITUDE BORON V

Liquid Boron with AnovA™ Technology

GUARANTEED ANALYSIS

Boron (B).....5.0%

Derived from: Boron Ethanolamine

F2278

**KEEP OUT OF REACH OF CHILDREN
WARNING**

PRECAUTIONARY STATEMENTS

If medical advice is needed, have product container or label at hand.
Keep out of reach of children.
Read label before use.

HAZARD STATEMENTS

May be harmful if swallowed.
May be harmful in contact with skin.
May be harmful if inhaled.
Causes eye irritation.

Prevention:

Wash hands, face and other affected areas thoroughly after handling.

Response:

Call a **POISON CENTER** or doctor/physician if you feel unwell.

IF INHALED: Call a **POISON CENTER** or doctor/physician if you feel unwell.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

If eye irritation persists: Get medical advice/attention.

General information

BORON V is formulated for foliar application of boron to row crops, vegetables, fruit & nut trees and fruiting vine crops. *BORON V* is developed and formulated for quick and effective boron nutrition delivery to prevent and correct boron deficiencies. Boron V should be used to supplement a balanced fertility program.

Directions For Use

Rate Information: *BORON V* application rate required is determined by the crop growth stage, nutrient requirement and need at time of application. Boron is required throughout the growing season and not very mobile within plant tissue. Because of this immobility, *BORON V* should be applied multiple times to adequately satisfy crop needs, especially to newly formed tissue.

Foliar Applications: Applicable rate range is 4 to 24 ounces per acre as a foliar spray, depending on crop stage and requirement. Apply in adequate spray volume to ensure complete coverage of foliage. If multiple applications are planned 4-12 ounces can be used, rate depending on desired crop response. Single applications can be matched with tissue test results or use 16 ounces for general use rate. As a general rule most crop's boron requirement increases as it enters reproductive stages, rates should increase during prebloom, bloom and maturity phases. *BORON V* can be tank mixed with foliar fungicides, insecticides, plant growth regulators and most herbicides over most crops.

Soil Applications: Applicable rate range for soil application is 16 to 32 ounces per acre in irrigation water or when sidedressed with any NPK application. Drip irrigation using multiple applications should use 16 ounces per acre as a general rule, applying during known high boron requirement timings like prebloom and bloom.

SHAKE WELL BEFORE USE

Mixing, Handling & Compatibility

BORON V is compatible with most agricultural fertilizers, crop protection products and pesticides. It is always advisable to complete a jar test when new tank mixes are planned. It is especially important to jar test mixtures when new water sources are used as pH and hardness can affect the mixture.

Storage & Disposal

Store product in original container. Do not store in excessive cold or heat. Do not reuse container. Do not contaminate water, food or feed by storage or disposal. Keep packaging closed, securely fastened and upright. Triple rinse or equivalent and dispose of container in accordance with local, state and federal regulations.

WARNING: This material contains boron and should be used only as recommended. It may prove harmful when misused. Boron may be injurious to certain crops, use as directed.
