

GENERAL INFORMATION:

Ammend™ Micro Pak is a heavily chelated nutrient blend formulated for use with most liquid fertilizers and foliar sprays. Ammend™ Micro Pak is formulated for use with cropping systems that have shown benefit to a nitrogen or potassium starter fertilizer application or have exhibited deficiencies to zinc, sulfur, manganese, or boron. Ammend™ Micro Pak contains many nutrients that are necessary to enhance plant growth, increase early season root development, and correct nutrient deficiencies in order to maximize yield potential but are frequently absent in typical starter or pop-up fertilizers. Ammend™ Micro Pak may be used in conjunction with most fertilizers that are used as a soil or foliar application to any food or fiber crop where the addition of one or more of the nutrients contained in Ammend™ Micro Pak would be beneficial.

DIRECTIONS FOR USE:

Use Ammend™ Micro Pak in conjunction with sound agronomic management practices including a balanced fertility program that includes the use of starter or pop-up fertilizers placed with or near the seed or foliar applications where additional essential crop nutrients are strategically placed or applied to increase early season plant growth and enhance yield. Applications made to soil as a starter fertilizer in furrow with the seed or near the seed in a band at planting time provide ideal placement and timing for crucial nutrients provided by Ammend™ Micro Pak to maximize product effectiveness and nutrient use efficiency. Ammend™ Micro Pak may also be used as a postemergence foliar application to crops alone or in combination with other foliar fertilizers or crop protection products. Refer to the requirements of your state for specific crop recommendations.

GENERAL GUIDELINES: Several variables are known to influence the proper rate of application to prevent or resolve a specific nutrient deficiency. Refer to the requirements of your state for specific crop recommendations or use in accordance with recommendations of a qualified individual or institution such as a certified crop advisor, university extension representative or publication, trained agronomist, or follow the guidelines of an approved nutrient management plan.

SOIL APPLICATIONS: Apply 1 to 2 quarts per acre as a starter fertilizer or starter fertilizer additive, or use as a soil applied broadcast application in a balanced fertility program. Water may be added to increase application rate.

ALFALFA, CORN, DRY EDIBLE BEAN, POTATO, SMALL GRAINS, SORGHUM AND SOYBEAN: Apply 1 to 2 quarts Ammend™ Micro Pak per acre as an in-furrow pop-up fertilizer or 2 by 2 inch band at planting alone or in combination with other liquid fertilizers as prescribed by state recommendations. Apply 3 to 5 gallons as a broadcast application.

POSTEMERGENCE APPLICATIONS: Apply 1 to 2 quarts per acre to an actively growing crop to prevent the occurrence of a nutrient deficiency or as remediation to an existing nutrient deficiency. Post-emergence applications should be made in a minimum of 10 gallons per acre spray volume.

For use in Wisconsin: The Nutrient Application Guidelines for Field, Vegetable, and Fruit Crops in Wisconsin - publication A2809 indicates that alfalfa, corn, oat, potato, sorghum, and wheat will respond to a specific nutrient constituent or combination of nutrients found in Ammend™ Micro Pak when applied in-furrow or near the seed at planting. For all crops in Wisconsin, all nutrients in starter fertilizers are to be counted against the amounts of nutrients recommended based on the crop to be grown and soil test results.

GUARANTEED ANALYSIS

Grade 4-0-5

Total Nitrogen (N)	4.0%
2.0% Ammoniacal Nitrogen	
2.0% Other Water Soluble Nitrogen	
Soluble Potash (K ₂ O)	5.0%
Sulfur (S)	3.0%
3.0% Combined Sulfur (S)	
Boron (B)	0.5%
Manganese (Mn)	1.0%
1.0% Chelated Manganese (Mn)	
Zinc (Zn)	4.5%
4.5% Chelated Zinc (Zn)	
Derived from potassium thiosulfate, manganese EDTA, zinc EDTA, boric acid, aqua ammonia and ethylenediaminetetraacetic acid.	

KEEP OUT OF REACH OF CHILDREN CAUTION

Warning: This fertilizer contains Boron, which may be injurious to certain crops. Contact your local county agent or field consultant for specific information.

Avoid contact with skin, eyes or clothing. Do not take internally. Wear chemical-resistant eyewear and gloves, long-sleeve shirt and pants and shoes and socks. Do not eat, drink, smoke or chew gum while using this product. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. In addition, follow precautionary statements on all products used with this material. Clean affected clothing, shoes, and protective equipment before reuse. Personal Protective Equipment: Wear chemical splash goggles, impermeable gloves, long sleeves, long pants and rubber apron.

CAUTION: This material should only be used as recommended. It may prove harmful when misused.

- Avoid contact with eyes
- Avoid contact with skin
- Avoid breathing fumes or spray mist
- Do not swallow
- Wash thoroughly after handling

First Aid:

-In the event of eye and/or skin contact: flush affected areas with large quantities of plain water. If irritation persists seek medical attention.
-If swallowed: immediately give large quantities of water to conscious person, do not induce vomiting. Seek medical attention immediately.
-If inhaled: seek medical attention if adverse effects occur.

Personal Protective Equipment:

Wear gloves and protective clothing. Wear eye protection such as safety glasses, goggles or a face shield.

Storage & Disposal:

Ammend™ Micro Pak freezes at 0° F. Ammend™ Micro Pak should be stored in polyethylene or stainless steel tanks with polyethylene or stainless steel fittings.

Do not reuse empty container. Triple rinse (or equivalent) after mixing and loading product. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler, visit the ACRC web page at www.acrcycling.org. Decontaminated containers and materials must be disposed of in a manner allowed by local, state, and federal laws and regulations.

IMPORTANT WARRANTY DISCLAIMER AND NOTICE READ CAREFULLY BEFORE PURCHASE OR USE OF THIS PRODUCT

Conditions of Sale and Warranty Limitation: The Directions for Use of this product reflect the opinion of experts based on field use and tests. The directions are believed to be reliable and should be followed carefully. However, it is impossible to eliminate all risks inherently associated with use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or use of the product in a manner inconsistent with its labeling, all of which are beyond the control of West Central Distribution, LLC or the seller. All such risks shall be assumed by the buyer. West Central Distribution, LLC warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes referred to in the Directions for Use, subject to the inherent risks referred to above. West Central Distribution, LLC makes no other express or implied warranty of fitness or merchantability or any other express or implied warranty. In no case shall West Central Distribution, LLC or the seller be liable for consequential, special or indirect damages resulting from the use or handling of this product. West Central Distribution, LLC and the seller offer this product, and the Buyer and the User accept it, subject to the foregoing Conditions of Sale and Warranty, which may be varied only by agreement in writing signed by a duly authorized representative of West Central Distribution, LLC.
