GENERAL INFORMATION

AQUEDUCT SWDG is a non-ionic soil surfactant impregnated onto a spreadable, water dispersible granular carrier. This results in a dry granular formulation that provides performance equal to AQUEDUCT Liquid Formulation with the convenience of a spreader application. AQUEDUCT was developed to provide turf managers with an effective tool to treat existing localized dry spots, wet spots, and other water related problems without concern of burning turf. AQUEDUCT SWDG can safely be applied in the spring, before the irrigation system is activated, as well as during the summer when environmental stress conditions may impact turf performance.

DIRECTIONS FOR USE

All Fine Turfgrasses

Treating Existing Problems: Apply 2.5 lbs of AQUEDUCT SWDG/1000 sq ft (1.2 kg/100 m²). Reapply at 2.5 lbs/1000 sq ft on a weekly basis as needed. AQUEDUCT SWDG DOES NOT NEED TO BE WATERED IN FOLLOWING APPLICATION. Less than 0.25 inches (6 mm) of rainfall or irrigation is necessary to release AQUEDUCT SWDG off its carrier.

Aquatrols highly recommends the use of Primer® Select Matrix Flow Soil Surfactant if a preventative program is desired.
