EPA SLN No.: AL-100001

Refer to the Arsenal® PowerLine™ herbicide product main label, EPA Reg. No. 241-431, for complete Directions For Use and all applicable restrictions and precautions. When following the instructions on this supplemental label, the user must have this label and the entire Arsenal PowerLine container label in possession at the time of pesticide application.

Directions For Use

Arsenal PowerLine may be applied as a spot spray or as a broadcast treatment for the control of cogongrass (*Imperata cylindrica*) in areas that may be grazed or cut for hay.

For control of localized spots of cogongrass, apply **Arsenal PowerLine** as a 1% volume/volume (v/v) solution for a directed foliar spot treatment. Dense populations of cogongrass require a broadcast application. Optimal control will be obtained with a late summer-early fall broadcast application of **Arsenal PowerLine** at the rate of 3 pints (48 fl ozs) per acre with 2 pints of methylated seed oil (MSO) per acre. See federal label for additional information on spray adjuvants and spray volume. Follow-up spot treatment may be required to achieve desired control. Refer to federal label for recropping interval.

WARNING: Warm-season forage grass, such as bahiagrass and bermudagrass, and cool-season grass, such as fescue, will be severely injured or killed when treated with the 3 pints (48 fl ozs) per acre rate of **Arsenal PowerLine**.

Limitations and Precautions

Remove livestock from treated areas before treatment and for 30 days after treatment; or if livestock are not removed, **DO NOT** sell livestock for slaughter for 30 days following treatment.

DO NOT cut treated area for hay for at least 30 days after treatment.

DO NOT use on food or feed crops. **DO NOT** allow the spray solution to drift onto food or feed crops.

Maximum yearly application rate is 3 pints (48 fl ozs) per acre.

Injury or loss of desirable trees or other plants may result if **Arsenal PowerLine** is applied on or near desirable trees or other plants, on areas where their roots extend, or in locations where the treated soil may be washed or moved into contact with their roots.

Observe all cautions and limitations on this label and on the label of products used in combination with **Arsenal PowerLine**. **DO NOT** use **Arsenal PowerLine** other than in accordance with instructions set forth on this label. Keep container closed to avoid spills and contamination.

Conditions of Sale and Warranty

The **Directions For Use** of this product reflect the opinion of experts based on field use and tests. The directions are believed to be reliable and must be followed carefully. However, it is impossible to eliminate all risks inherently associated with the use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or use of the product in a manner inconsistent with its labeling, all of which are beyond the control of BASF CORPORATION ("BASF") or the Seller. To the extent consistent with applicable law, all such risks shall be assumed by the Buyer.

BASF warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes referred to in the **Directions For Use**, subject to the inherent risks, referred to above.
