Tree nuts, Pome Fruit, Fruit trees	Mites, Aphids, Weevils, Navel Orange Worm, Scales, San Jose Scale	16 - 24 oz.

SHAKE WELL BEFORE USING. USE DILUTED SOLUTION IMMEDIATELY AFTER MIXING. DO NOT STORE DILUTED SOLUTION.

Application Instructions: Do not apply more than two consecutive applications. To counter potential for resistance, rotate **BEMIX™** Acaricide-Insecticide with a different product after two applications. Apply early in the morning or in late afternoon. Spray directly onto the insect or mite. Repeat applications at an interval of 7 days, depending on mite/insect pressure. To prevent product degradation, do not use spray water with a pH lower than 4.0 or higher than 8.0. Use pH correctors for pH's outside of these ranges.

HAND HELD EQUIPMENT: When using hand held equipment use 0.16-0.24/oz of **BEMIX™** Acaricide-Insecticide concentrate per gallon of spray water. Apply enough to cover the entire surface of infested tissues. Use higher rate for heavy infestations.

PHYTOTOXICITY: **BEMIX™** is not phototoxic and will not burn when used in accordance with label use instructions.
