BLOCKER™ 4F
EPA REG. NO. 5481-8992

This recommendation is made as permitted under FIFRA § 2(ee) and has not been submitted to or approved by the Environmental Protection Agency (EPA).

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

All applicable directions, restrictions and precautions on the EPA registered label for BLOCKER 4F are to be followed.

This bulletin must be in possession of the user at the time of pesticide application.

CROP	DISEASE	QTY PRODUCT PER ACRE	FL. OZ. BLOCKER 4F/1,000 ft. OF ROW	RECOMMENDED APPLICATION
POTATOES (processing, chipper, and seed potato or fresh market with grade of 4oz. or greater)	COMMON SCAB (<i>Streptomyces scabies</i>) Stem Canker/Black Scurf (<i>Rhizoctonia solani</i>)	5 to 10 pints per acre.	5.2 to 10.4 fl.oz.	BAND APPLICATION: Apply in 10 to 20 gallons of water per acre based on 34-inch row spacing. One nozzle in front of the opening shoe and another nozzle angled back into the closing discs, in order to get mixing of the Blocker 4F in the soil, covering the seed piece as part of the planting operation or up to two weeks prior to planting. Avoid spraying Blocker directly on the potato seed piece. Do not exceed 5 lbs. of a.i./A in any one season

RESTRICTIONS:

Do not plant root crops in PCNB treated fields within 12 months of the last application of PCNB unless PCNB is registered for use on those crops.

In Idaho, Nevada, Oregon, and Washington, do not make chemigation applications of Blocker 4F if Blocker 4F or other PCNB products were applied as a band application in furrow at planting or prior to planting.

IMPORTANT: Read the entire Directions for Use and the Conditions of Sale and Limitation of Warranty and Liability before using this product.
