

# Blue 76 Plus®

Natural Fertilizer

More nutritious fruits

- **Blue 76 Plus** is the summit of Applied Biotechnology In fertilizer. This product combines **76** elements Colloidal, highly available absorption in plants. A high percentage of Humic, fulvic acid and amino acids Concentrated together with a broad spectrum of specific micro-organisms; Fungi, bacteria and actinomycetes that together improve the nutrition of plants, reduce the incidence of nutritional status when unlocking limitations in providing permeability.
- **Blue 76 Plus** is a liquid fertilizer of Universal use. It works in any medium of increase; Hydroponics, drip irrigation, microaspiration, gravity. As well as in all Crops; Fruits, vegetables, trees, grains, ornamental plants. This product has always demonstrated an increase in production and better fruit quality.
- **Blue 76 Plus** is complete plant nutrition, which should be applied to both soil and foliage. Applied to the irrigation system will provide the nutrients necessary and maintain the required permeability of the soil, so the plant will have continuous availability of food. Also **Blue 76 Plus** Restores soil organic matter levels and with this increases the capacity to retain the mineral nutrients that are applied to the soil. This product does not cover irrigation hoses for drip, on the contrary cleans them. In irrigation rolled can be apportioned to the irrigation channel.

- **Blue 76 Plus** applied foliar will increase the production, since the set of nutrients will be used in their totality of the plant. Stomata of the leaves take advantage of faster nutrients than roots, so that the processes of flowering, mooring, fruit density will benefit. In addition the plant moisture will be better, so that the nutrient transfer of the soil will be more effective.

## ● Blue 76 Plus Benefits

- **100% Natural Ingredients**
- **Universal: For all types of cultivation in any medium**
- **Does not obstruct irrigation systems**
- **Increases fruit size and consistency**
- **Increases agricultural production**
- **Reduces pathogen diseases**
- **Liquid form to facilitate its application**
- **Highly available nutrients**
- **High quality of macro and micro elements**
- **Increases sugars, proteins and minerals**
- **Greater tolerance to stressors**
- **Accelerate crop cycle, faster and longer cuts**
- **Increases nutrient levels: chlorophyll, minerals**
- **Activates the immune system of the plant.**
- **Increased number of fruits, size and homogeneity**
- **100% pathogen free**

## Content.

Total Nitrogen (N)	0.3%
Nitrogen soluble in water	
Phosphorus (P2O5)	0.1%
Potassium Soluble (K2O5)	0.5%
