

Blue Cal 66

BLUE CAL 66

Plant Nutrient For Agriculture

Net Content: 0.25 Gallons (0.946 liter) 2.5 Gallons (0.946 liter)

Weight per Gallon: 14.2 lb @ 68°F

CAUTION
Keep Out The Reach of Children

Blue Cal 66 Is a product based on calcium carbonate, with an average particle size of 1.6 microns.

It's a liquid formulation and can be used on drip and foliar application.

Blue Cal 66 works on any growth, and all crops such as fruits, vegetables, trees, vines, flowers and grain crops.

The released calcium is absorbed by the leaves, stomas and roots to nurture the plants and enable sprouts and fruits.

PROPERTIES

Some benefits of applying calcium to crops are to avoid the drop of flowers and young fruits, to avoid blossom end rot on some fruits, and increased shelf life. Calcium enables cellular growth, contributes to the absorption of elements and strengthens cell walls of crops.

DESCRIPTION CONTENT

Product: Plant nutrient for agriculture

Density: 14.2 lb @ 68°F

Color: White

Stability: Two years after manufacturing date

Toxicity: None

GUARANTEED ANALYSIS

Calcium (Ca) 26%

Derived From: Calcium Carbonate

Information regarding the contents and levels of metals in this product is available on the internet at <http://www.aapfco.org/metals.html>
