PRODUCT INFORMATION

BLZN OIL is used to form a physical barrier over the top of Black Label® Zinc. Use rates are based on surface area of the tank to be treated-not per gallon.

DIRECTIONS FOR USE

The calculations for the amount of BLZN OIL used in Black Label products are based on the diameter of the tank. BLZN OIL can be injected into the bottom of the tank or poured in directly as it will migrate to the top of the tank over time on its own. Once in the tank, it will not volatilize or evaporate. Retreatment is only necessary if the tank is completely drained.

A minimum of 0.125 of an inch layer of oil up to 0.25 of an inch is recommended. Table 1 refers to the amount required to form a 0.25 inch layer, cut the recommended rate by 50% to form a 0.125 inch in layer. Refer to Table 1 to determine use rates.

Table 1

Tank Width Diameter (ft.)	Approximate Gallons	Oil to be added (gal)
50	150,000	306
21	30,000	54
12	20,000	18
10	6,500 to 10,000	12

STORAGE AND DISPOSAL

STORAGE: Store locked up. Use and store in cool, dry, well ventilated area away from heat and all sources of ignition. Keep containers tightly closed and upright when not in use. Store only in approved containers. Protect containers against physical damage.

DISPOSAL: Do not contaminate water, food or feed by storage or disposal. Wastes may be disposed of on-site or at an approved waste disposal facility. Triple rinse (or equivalent) adding rinse water to spray tank. Dispose of contents/container in accordance with local/regional/national/international regulations. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler, visit the ACRC web page at www.acrecycle.org.
