

Brandt Reaction[®] S LS

Nutrient Solution

8-0-0

Guaranteed Analysis

Total Nitrogen (N)	8.0%
7.9% Ammoniacal nitrogen	
0.1% Urea nitrogen	
Sulfur (S)	9.0%

Derived from ammonium sulfate and urea.

F76

General Information

BRANDT REACTION S LS is a liquid plant food especially formulated to increase nutrient availability for correction of sulfur deficiencies. It quickly boosts plant growth during critical or high growth periods. This product is recommended for use on, but not limited to, vegetable and row crops, deciduous fruit and nut trees, citrus, avocados, vine and berry crops, ornamentals, pasture and range grasses.

Mixing and Handling Instructions

Compatibility: This product may be applied separately or in conjunction with most other fertilizers. It is compatible with most acid based fertilizers and other plant nutrients. However, a compatibility test is recommended if the desired combination has not been previously used.

DO NOT mix with ammonium thiosulfate, potassium thiosulfate or other high pH or high free-ammonia products. When mixing this product with UAN 32, it is suggested to use up to one gallon of water per one gallon of UAN 32 to insure complete and thorough mixing. This product is a low pH material and should only be applied with suitable equipment.

Application Method: This product is most effective when applied through an irrigation system or banded. Soil applications can be incorporated in liquid fertilizer or applied separately. Accurate and properly calibrated injection equipment and an irrigation system that is operated at maximum distribution uniformity will help avoid plant injury and/or product ineffectiveness. For best results, with the exception of center pivot and lateral systems, apply this product toward the end of the irrigation set. Allow sufficient time for the product to be flushed completely out of the irrigation system prior to turning off the irrigation water.

Net Contents: 260 gallons (984 liters)

Density: 10.3 lb/gal @ 68°F
Net Weight: 2673 lb (1212 kg)

Mixing: Add this product to a partially filled tank and slowly add the remaining water while maintaining constant agitation. Always add this product to the spray tank before adding other agricultural chemicals. To avoid potential phytotoxicity, test a small amount of solution on the intended target area to ensure plant compatibility prior to the planned application.

Rate Recommendations

In the absence of a soil or leaf analysis to determine sulfur deficiency, apply the following rates:

Mild Deficiency

Moderate to Severe Deficiency

2-5 gallons/acre
5-10 gallons/acre
After initial application, monitor plant nutrient levels and apply again as needed.

WARNING: Causes eye irritation.

Precautionary Statements: Wash thoroughly after handling.
First Aid: *If in eyes:* Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists, get medical attention.

Storage and Disposal: Do not contaminate water, food or feed by storage or disposal. Keep out of reach of children. Store away from incompatible materials. Dispose of contents/container in accordance with local authority requirements.
