

DRY B-17

F1252

DIRECTIONS FOR USE

RATES:

CAUTION: Do not apply CNI DRY B-17 directly to seed or at a condition where it will have direct contact with seed. Over application of CNI DRY B-17 may cause Boron toxicity. Consult a crop advisor before use to maintain adequate levels for your crop.

Foliar applications: Tree and Vines: Apply up to 5 pounds per acre with enough water for thorough coverage.

Row, Field, Pasture Crops: Apply up to 3 pounds per acre with enough water for thorough coverage.

Soil Applications: Apply 2 to 10 pounds per acre. Apply with enough water or liquid carrier to move product to root zone for proper uptake.

Dormant and Post Harvest Applications: Apply at a rate of 2 to 8 pounds per acre with sufficient water for thorough coverage. Apply post harvest to pre-bloom.

CONDITIONS OF SALE

Seller warrants that this product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use. Weather, crop conditions, timing and methods of applications, mixtures with other chemicals not specifically recommended and other influencing factors in the use of this product are beyond the control of the seller. Buyer assumes all risks of use, storage or handling of this material not in strict accordance with directions given herewith.

GUARANTEED ANALYSIS

Boron (B)17.5%
Derived from boric acid

GENERAL INFORMATION:

CNI DRY B-17 is designed to be tank mixed for use on foliar applications as well as soil-applied applications.

WARNING: This product contains boron in amounts which could be excessive for some crops. Contact your local agricultural authority for information on specific crops. Use of this fertilizing material on any crops other than those recommended may result in serious injury to the crops.

COMPATIBILITY:

CNI DRY B-17 is compatible with most commonly used pesticides. Always perform a jar test if compatibility with a mixture is uncertain.

Net Wt: 25 Lbs. (11.34 Kg.)

Lot #: 12345
