GENERAL INFORMATION

CYNDER™ is a proprietary mix of water conditioning agents and surfactants. It is designed for use with herbicide products registered for agriculture, forestry, turf and ornamental, industrial sites, noncropland and rights-of-way.

CYNDER is effective with a broad range of herbicides, especially those based on glyphosate. It improves wetting and deposition of the spray mixture resulting in a more uniform spray deposit, which can increase the degree and rate that the herbicide is absorbed into the plant.

DIRECTIONS FOR USE

CYNDER may be applied by ground, aerial and any other type of spray equipment recommended by the manufacturer's pesticide label.

USE RATES

Use 1-4 quarts of CYNDER per 100 gals of spray mix for water conditioning and herbicide activation. Always follow the adjuvant use recommendations as shown on the pesticide label.

For pesticides that permit the use of a surfactant at a higher rate, follow instructions on that pesticide label. **HOWEVER, DO NOT ADD THIS PRODUCT AT A RATE WHICH EXCEEDS 5% OF THE FINISHED SPRAY VOLUME.** Use caution at the higher use rates. When applying to a sensitive crop, first treat a small area to determine if there are any adverse effects to the crop.

USE RESTRICTIONS

NOT FOR AQUATIC USE.

The addition of an adjuvant to some herbicides or tank mixes may cause phytotoxicity to susceptible crops. Do not use CYNDER with a herbicide if an adjuvant is prohibited by the manufacturer.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage and disposal.

STORAGE: Store in original container only and keep tightly sealed. Store in closed storage area.

PRODUCT DISPOSAL: Dispose of contents in accordance with all government regulations. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of federal law. Wastes resulting from the use of this product may be disposed of onsite or at an approved waste disposal facility.

CONTAINER HANDLING: Dispose of container in accordance with all government regulations. Triple rinse (or equivalent), then offer for recycling, if available, or reconditioning, if appropriate. Alternatively, puncture and dispose of the container in a sanitary landfill, or by other procedures approved by state and local authorities. Recycling cleaned containers is the best option of container disposal. The ACRC (Agricultural Container Recycling Council) operates a national recycling program. To contact your state or local ACRC recycler, visit the ACRC web page at www.acrecycle.org.
