Capstone[®]

EPA Reg. No. 62719-572

For Control Of Broadleaf Weeds And Certain Woody Plants At the Water's Edge

**Not for Sale, Distribution, or Use in New York State
Not For Sale, Distribution, or Use in the San Luis Valley of Colorado**

This supplemental label expires on June 30, 2019 and must not be used or distributed after this date.

ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read the label affixed to the container for Capstone[®] herbicide before applying. Carefully follow all precautionary statements and applicable use directions.
- Use of Capstone according to this supplemental labeling is subject to all use precautions and limitations imposed by the label affixed to the container for Capstone.

CAUTION

Directions for Use

For control of annual and perennial broadleaf weeds and woody plants and vines in

- rangeland, permanent grass pastures (including grasses grown for hay*), Conservation Reserve Program (CRP),
- forests, and
- non-cropland areas for example airports, barrow ditches, communication transmission lines, electrical power and utility rights-of-way, fencerows, gravel pits, industrial sites, military sites, mining and drilling areas, oil and gas pads, non-irrigation ditch banks, parking lots, petroleum tank farms, pipelines, roadsides, railroads, storage areas, dry storm water retention areas, substations, unimproved rough turf grasses, and
- natural areas (open spaces) for example, campgrounds, parks, prairie management, trailheads and trails, recreation areas, wildlife openings, and wildlife habitat and management areas,
- including grazed areas in and around these sites.

Use within sites listed above may include applications to seasonably dry wetlands (including flood plains, marshes, swamps, or bogs) and around

standing water on sites such as deltas and riparian areas.

***Hay from grass treated with Capstone within the preceding 18-months can only be used on the farm or ranch where the product is applied unless allowed by supplemental labeling**

It is permissible to treat non-irrigation ditch banks, seasonally dry wetlands (such as flood plains, deltas, marshes, swamps, or bogs) and transitional areas between upland and lowland sites only when dry. Capstone can be used to the water's edge. When controlling weed species along the water's edge, take precautions to minimize overspray to open water when treating target vegetation around non-flowing, quiescent or transient water and when making applications to control unwanted plants on banks or shorelines of flowing water. Note: Consult local public water control authorities before applying this product in and around public water. Permits may be required to treat such areas.

Environmental Hazards

Do not apply directly to water. Take care to minimize the incidental overspray along the shoreline when applying to terrestrial plants at the water's edge or to water in areas where surface water is present. Do not apply directly to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwater or rinsate.

General Use Information

Control of Terrestrial Weeds at the Water's Edge

Use to control weed species rooted along the water's edge. Applications should be limited to cover the targeted terrestrial plant species and minimize the incidental overspray into the adjacent water. Apply the specified rate of Capstone as a coarse low-pressure spray as ground broadcast or spot applications. Spray volume should be sufficient to uniformly cover foliage. Increase the spray volume to ensure thorough and uniform coverage when target vegetation is tall and/or dense.
