GUIDELINES FOR USE

CAVALIER G can be applied to all crops including row crops, field crops, trees, vines and vegetables.

Soil application rates generally range from 10-40 pounds per acre per growing season. For best results, apply in-furrow or by sidedress prior to planting. Product may also be broadcast applied in the fall prior to tilling or in the spring prior to planting.

CAVALIER G can be applied alone or it can be bulk blended with granular phosphate fertilizers. Unless applied immediately, it should not be applied as a blend with urea.

Follow label rates as well as the recommendations of your crop advisor or Innvictis representative.

Always consult Material Safety Data Sheet for instructions on proper handling.
