## GENERAL INFORMATION

MaxCal is a water soluble foliar nutritional fertilizer of macro and micro nutrients. It is designated for foliar application and may be applied alone or in tank mixes. However, when use of an unfamiliar mix is made, a compatibility test is always recommended. Foliar fertilization is a supplement to a regular fertilizer program and will not supply the total nutrients required by a crop. **MaxCal** is recommended as a foliar nutrition to be applied to crops where disorders due to insufficient calcium are anticipated.

## DIRECTIONS FOR USE
