GENERAL INFORMATION

CHASER® contains protein hydrolysate obtained from hydrolysis of protein to amino acids and short polypeptides that are a source of nitrogen. CHASER is only for use in combination with water-soluble plant nutritional products which are formulated for foliar, sidedress or drip irrigation application.

CHASER is believed to be compatible with most agricultural water-soluble plant nutritional products. If physical compatibility with another fertilizer product is unknown, use a jar compatibility test.

The addition of calcium to the CHASER blend is recommended.

When applying the CHASER blend as a foliar spray, always use a spreader penetrant such as WideSpread® Max.
