ChelStar

14% Copper Chelate

Fully Chelated Micronutrient for Plant Nutrition

ChelStar 14% Copper Chelate 6-0-0

GUARANTEED ANALYSIS

Total Nitrogen (N).....	6.0%
6.0% Water-Soluble Nitrogen	
Copper (Cu).....	14.0%
14.0% Chelated Copper	

Derived from copper disodium ethylenediaminetetraacetate (CuNa₂EDTA).

KEEP OUT OF REACH OF CHILDREN

Precautionary Statements: Wash thoroughly after handling. Do not eat drink or smoke when using this product.

First Aid: If swallowed: Call a Poison Center or doctor if you feel unwell. Rinse mouth.

GENERAL INFORMATION:

ChelStar 14% Copper Chelate is a fully chelated, water-soluble, powdered form of copper EDTA useful for prevention and correction of copper deficiency in crops. Soil application is the preferred application method to prevent copper deficiency. Foliar application, however, will provide correction when a soil application is impractical.

SOIL APPLICATION DIRECTIONS:

ChelStar 14% Copper Chelate may be used on all types of soils. It should be dissolved in water or fluid fertilizer, or dry blended with water-soluble fertilizers for optimum delivery and coverage. For trees or individual plants, *ChelStar 14% Copper Chelate* may be blended with an inert (such as soil or sand) or sprinkled directly on the soil uniformly under the plant's drip line then watered in. Soil applications may also be made by dissolving in water and then mixing or metering into drip, sprinkler or furrow irrigation systems.

FOLIAR APPLICATION DIRECTIONS:

ChelStar 14% Copper Chelate may be applied in water or in combination with most pesticides. Buffer the spray solution to a pH of 6 to 6.5 for best performance. Thorough coverage and the use of wetting agents often enhance nutrient uptake from foliar sprays. Application rates and dilution factors depend on crop sensitivity, the amount of foliage to be sprayed and the application method. Avoid applying *ChelStar 14% Copper Chelate* when plants are suffering from moisture stress. If there is any doubt, apply the spray solution to a small test area of the crop or foliage to assess any undesirable effects or phytotoxicity before general application.

AERIAL APPLICATION DIRECTIONS: Apply 0.33 lb. of *ChelStar 14% Copper Chelate* per acre in at least 10 gal. of water. For application timing and frequency, refer to appropriate foliar application recommendation below.

CROP RECOMMENDATIONS – SOIL APPLICATION

VEGETABLE CROPS (including beans, carrots, celery, cucumbers, lettuce, melons, onions, peas, peppers, potatoes, spinach, sweet corn, tomatoes) and **FIELD CROPS** (including alfalfa, corn, dry beans, forage grasses, peas, rice, safflower, sorghum, sugar beets, sugarcane): Apply *ChelStar 14% Copper Chelate* at 2 to 4 lbs. per acre.

TREE & VINE CROPS: (including almond, apple, apricot, avocado, berry, cherry, citrus, grape, mango, olive, pear, peach, pistachio, plum, walnut): Apply *ChelStar 14% Copper Chelate* at 2 to 5 lbs. per acre or 0.5 to 2 oz. per inch of tree diameter.

ORNAMENTAL SHRUBS & TREES: (including azaleas, gardenias, junipers, pines, roses): Apply *ChelStar 14% Copper Chelate* at 1 Tbsp. for small shrubs and up to 1 Tbsp. per inch of tree diameter for large trees and shrubs.

TURF: Apply *ChelStar 14% Copper Chelate* at 0.5 lb. per 10,000 sq. ft. or 2 lbs. per acre.

Note: the rates provided above are based on broadcast application. If broadcast rates are used for spot or banded applications, phytotoxicity may result.

CROP RECOMMENDATIONS – FOLIAR APPLICATION

TREES (CITRUS) Apply *ChelStar 14% Copper Chelate* at 1 to 2 lbs. per 100 gal. of cover spray any time except during bloom.

TREES & VINE CROPS: (excluding citrus): Apply *ChelStar 14% Copper Chelate* at 1 to 2 lbs. per acre in sufficient spray volume for thorough coverage (25 gal. minimum) at dormant/delayed dormant before bloom, then after full bloom at 2 to 3 week intervals as needed. **NOTE:** For smooth-skinned fruit (peach, pear, apple, etc.) apply 1 lb. per acre in 50 to 100 gal. of water.

VEGETABLE & FIELD CROPS (ground equipment only): Apply *ChelStar 14% Copper Chelate* at 0.33 to 1.33 lbs. per acre in sufficient spray volume for thorough coverage (25 gallon minimum).

TURF: Apply *ChelStar 14% Copper Chelate* at 1 Tbsp. per 1,000 sq. ft. for general turf. Apply at 1 tsp. per 1,000 sq. ft. for golf greens. Always apply in sufficient spray volume for thorough coverage.
