

CITRI-CHE[®] ZINC 10%

EDTA/Citric Acid Chelated Zinc

6-0-0

Guaranteed Analysis

Total Nitrogen (N)	6.00%
6.00% Ammoniacal Nitrogen	
Zinc (Zn)	10.00%
10% Chelated Zinc (Zn)	

Derived from: Zinc Chloride, Zinc Oxide, Zinc EDTA, Citric Acid and Ammonium Hydroxide.

Store above 32°F

KEEP OUT OF REACH OF CHILDREN

WARNING

Causes serious eye irritation. Causes skin irritation. Harmful if swallowed. Harmful if inhaled. May cause respiratory irritation.

PRECAUTIONARY STATEMENTS

Wash hands thoroughly after handling. Wear eye and face protection and protective gloves. Avoid breathing mist, spray or fumes. Use only outdoors in a well-ventilated area. Do not eat, drink or smoke when using this product. Store in a well-ventilated and secured place. Keep container tightly closed. Do not reuse empty container. Triple rinse, and then offer for recycling or for disposal in a sanitary landfill, or by other means approved by State and local authorities.

FIRST AID

IF IN EYES: Rinse cautiously with water for 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical attention.

IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a poison control center or doctor for treatment advice if you feel unwell.

IF ON SKIN: Wash with plenty of water. If skin irritation occurs: Get medical attention. Take off contaminated clothing and wash before reuse.

IF SWALLOWED: Immediately call a poison control center or doctor for treatment advice. Rinse mouth.

DIRECTIONS FOR USE:

This product is recommended to correct zinc deficiencies. This product should be used on the basis of a soil and/or tissue analysis. For fertilizer application rates suitable for your geographical area or the maximum allowable application rate per acre, consult a certified crop advisor or a trained agronomist. For specific crop recommendations in your area, consult your state's recommendations or your regional Winfield Plant Nutrition Specialist. Optimum rate of application will vary among fields, depending on soil pH, organic matter, and crop.

Mixing Instructions:

1. Put 1/3 water or fertilizer in tank.
2. Add other pesticides.*

WINFIELD™

3. Fill tank with balance of water or fertilizer.
4. Add CITRI-CHE ZINC 10%.
5. Agitate adequately to mix.

***CAUTION:** Check compatibility with orthophosphate fertilizers and other chemicals prior to mixing.

Soil Application: CITRI-CHE ZINC 10% can be applied in water or in combination with liquid fertilizer for pre-plant, starter or side dress applications. The most effective treatment of row crops is soil applications in a band at planting time or as a side dressing shortly after planting. For dry fertilizer applications use Winfield's granular micronutrients.

Apply 1-6 quarts of CITRI-CHE ZINC 10% per acre in liquid starter fertilizer. Rate will depend upon extent of the zinc deficiency and soil conditions.

Foliar Application: CITRI-CHE ZINC 10% diluted with water according to label recommendations, can be applied as a foliar spray. To insure even distribution on the leaf surfaces and increase the effectiveness of foliar application a small amount of wetting agent or surfactant may be added.

For ground application dilute 1 quart per acre of CITRI-CHE ZINC 10% in 3-20 gallons of water or for aerial application, dilute 1 quart per acre of CITRI-CHE ZINC 10% in 2-5 gallons of water. Spray to thoroughly cover foliage. Rates and timing of applications are dependent on local conditions and practices. Apply 4-6 weeks after planting. An ammonium sulfate source is recommended when tank mixing with glyphosate and some other herbicides.

Note: Foliar spray of CITRI-CHE ZINC 10% should not be considered as a substitute for soil application, but rather a supplement or temporary measure to correct zinc deficiency in most crops. A number of variables influence the rate of application necessary to control or correct a specific deficiency. For best results follow good agronomic practices.

For Use In Wisconsin – Use 0.5 – 1 lb/acre of zinc chelate in a band or 1-2 lbs/acre of zinc chelate in a broadcast application. Deficiencies may also be corrected by using 0.15 lbs/acre of zinc chelate as a foliar application.

One gallon of CITRI-CHE ZINC 10% contains 1.02 lbs. of actual zinc.

APPLICATION WITH IRRIGATION WATER

PIVOT, SPRINKLER, OVERHEAD AND SOLID SET IRRIGATION: Apply within 2 weeks of planting and before flowering using 1 to 4 quarts per acre or the dosage rates and timing recommended by your State Agricultural Experiment Station, Extension Specialists or Winfield Regional Plant Nutrition Specialist. This product may be mixed with most liquid fertilizers or pesticides before injection. Use a back-flow check valve to prevent material from back siphoning into water system.
