CleanWave™

EPA Reg. No. 62719-525

2(ee) Recommendation†

Tank Mix with Axial or Discover for One-pass Broadleaf and Grass Control in Wheat

For Distribution and Use Only in Montana

ATTENTION

† This recommendation is permitted under FIFRA 2(ee) and has not been submitted to or approved by the EPA or state lead pesticide agency.

- It as a violation of Federal law to use this product in a manner inconsistent with its labeling.
- Read and follow all applicable directions for use, precautions and limitations on the product label attached to the container for CleanWave herbicide.

CleanWave™ herbicide may be applied in tank combination with Axial or Discover for control of wild oats, green foxtail, yellow foxtail and Persian darnel plus broadleaf weeds listed on the label for CleanWave. For control of additional broadleaf weeds, 4 to 6 oz ae per acre of MCPA ester (0.5 to 0.75 pint per acre of a 4 lb/gal formulation) may be added. Apply to wheat and targeted weeds according to directions on all product labels. Only susceptible weeds which have emerged at the time of application will be controlled.

Follow applicable use directions, precautions and limitations on the EPA-registered labels for CleanWave, Axial and Discover herbicides.

Note: Group 1 (ACC-ase) resistant biotypes of grasses such as wild oats may not be effectively controlled by Axial or Discover. In situations where satisfactory grass control has not been obtained and Group 1 resistance is suspected, growers will be advised to conduct bioassays to determine grass susceptibility to the Group 1 mode of action.
