

## 1. IDENTIFICATION

- 1.1 GHS Product Identifier:** Cornbelt® Dri-Gard®
- 1.2 Alternate Name(s):** None
- 1.3 Chemical Class:** A drift and deposition management and water conditioning agent
- 1.4 Active Ingredient:** Ammonium sulfate, polyacrylamide and polysaccharide polymers, and antifoam agent.
- 1.5 Recommended Use/Restrictions:** Please see the label for specific recommendations regarding this product.
- 1.6 Supplier's Details:** Van Diest Supply Company  
1434 220<sup>th</sup> St. Post Office Box 610  
Webster City, Iowa 50595
- 1.7 Emergency Phone Number:** FOR CHEMICAL EMERGENCY, SPILL, LEAK, FIRE, EXPOSURE, OR ACCIDENT CALL CHEMTREC - DAY OR NIGHT 1-800-424-9300

## 2. HAZARDS IDENTIFICATION

- 2.1 Health Hazards:**
- |                                   |             |
|-----------------------------------|-------------|
| Acute Toxicity (Oral)             | Category 4  |
| Acute Toxicity (Dermal)           | Category 5  |
| Skin corrosion/irritation         | Category 3  |
| Serious eye damage/eye irritation | Category 2A |
- 2.2 Physical Hazards:** None
- 2.3 Environmental Hazards:** None

### Warning

**Hazards:**

- H302 Harmful if swallowed.  
H313 May be harmful in contact with skin.  
H316 Causes mild skin irritation.  
H319 Causes serious eye irritation.

**Prevention:**

- P264 Wash hands and other potentially contaminated body parts thoroughly after handling.  
P270 Do not eat, drink, or smoke while using this product.  
P280 Wear eye protection.

**Response:**

- P301+P312 **If swallowed or if on skin:** Call a poison control center if you feel unwell. P330 Rinse mouth.  
P332+P313 **If skin irritation occurs:** Get medical advice.  
P305+P351+P338 **If in eyes:** Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do. Continue rinsing.  
P337+P313 **If eye irritation persists:** Get medical advice.

**2. HAZARD IDENTIFICATION, continued****Disposal:**

P501 Dispose of contents and container in accordance with federal, state, and local requirements.

**2.4 Unclassified Hazards:** None

**3. COMPOSITION/INFORMATION ON INGREDIENTS**

| Material   | Common Name/<br>Synonyms | CAS # | % in Formulation |
|--|--------------------------|-------|------------------|
| Ammonium sulfate, polyacrylamide and polysaccharide polymers, and antifoam agent | N/A                      | N/A   | 100%             |

This Safety Data Sheet is not a guarantee of product specification. Specific ingredient content may be found on the product label.

**4. FIRST AID MEASURES**

|   |   |  |
|---|---|--|
| <b>4.1 General First Aid Recommendations are as follows:</b>    | <b>Eye Contact:</b>   | Hold eye open and rinse slowly and gently with clean water. Remove contact lenses after 5 minutes, if present, then continue rinsing eye. Seek medical advice as appropriate.  |
|   | <b>Skin Contact:</b>  | Remove contaminated clothing and clean skin thoroughly with soap and water. Wash contaminated clothing before reuse.   |
|   | <b>Ingestion:</b>   | Call a poison control center, physician, or hospital immediately for treatment advice as appropriate. Identify the name of the product, the type and amount of exposure, and symptoms the patient is experiencing. Do not induce vomiting unless told to do so by a poison control center, physician, or hospital. Do not give anything by mouth to an unconscious person. |
|   | <b>Inhalation:</b>  | Remove to fresh air. If person is not breathing, call 911 or an ambulance, and then give artificial respiration if possible.   |
| <b>4.2 Most Important Symptoms/Effects (acute and delayed):</b> | Overexposure by contact may cause severe irritation to eyes and mild irritation to the skin.  |  |
| <b>4.3 Indication of Need for Immediate Medical Attention:</b>  | If poisoning is suspected, or any symptoms are serious, immediately contact the poison control center, physician, or nearest hospital for instructions. Inform the contact of the name of the product, the type and amount of exposure, and symptoms the patient is experiencing. |  |

**5. FIREFIGHTING MEASURES**

|   |  |
|---|--|
| <b>5.1 Suitable Extinguishing Media:</b>                                  | Use any Class A, B, or C fire extinguisher such as a multi-purpose dry chemical extinguisher to extinguish a small fire in accordance with your company's established expectations.  |
| <b>Unsuitable Extinguishing Media:</b>                                    | Class BC-only fire extinguishers, are not ideal for small fires on this material.  |
| <b>5.2 Specific Hazards Arising from the Chemical:</b>                    | Hydrogen cyanide, carbon monoxide, and ammonia may be emitted under fire conditions.   |
| <b>5.3 Special Protective Equipment and Precautions for Firefighters:</b> | To fight larger fires, use full protective clothing and a self-contained breathing apparatus. Evacuate nonessential personnel from area to prevent exposure to fire, smoke, fumes, or products of combustion. Dike and collect water runoff. |

**6. ACCIDENTAL RELEASE MEASURES**

|  |   |
|--|---|
| <b>6.1 Personal Precautions, Protective Equipment, and Emergency Procedures:</b> | Using appropriate personal protective equipment specified in Section 8 – Exposure Control/Personal Protection, absorb any spilled material and place in a container for disposal. Disposal methods should be consistent with information in Section 13 – Disposal Considerations.   |
| <b>6.2 Methods and Material for Containment and Cleanup:</b>                     | Using safe handling precautions established elsewhere in this material safety data sheet, attempt to control the spill at its source if safe to do so. Control the release of material to prevent contamination of soil or bodies of water. Collect in a suitable container for disposal. Sweep up any spilled dry or dried material or absorbent and collect for disposal. Clean area with detergent, absorb wash water with absorbents, and collect in a suitable container for disposal. |

**7. HANDLING AND STORAGE**

|  |   |
|--|---|
| <b>7.1 Conditions for Safe Handling:</b> | Follow personal protective equipment recommendations as shown in Section 8 – Exposure Control/Personal Protection when handling this material, adjusted for specific handling methods and conditions, to prevent contact with this material. Wash thoroughly with soap and water after handling this material. Do not allow eating, drinking, tobacco use, and cosmetic application in areas where there is a potential for exposure to this material. Follow label instructions carefully. |
| <b>7.2 Conditions for Safe Storage:</b>  | Store this product in a well-ventilated area, in the original container. Secure material from access by children or domestic animals. Do not store this product near food, beverages, or tobacco products. Do not store with incompatible materials. Refer to Section 10- Stability And Reactivity, for incompatible materials.   |

**8. EXPOSURE CONTROL/PERSONAL PROTECTION****8.1 Occupational Exposure Limits:**

| Material      | CAS # | OSHA PEL             | ACGIH TLV            | Carcinogen |      |      |
|---------------|-------|----------------------|----------------------|------------|------|------|
|               |       |                      |                      | NTP        | IARC | OSHA |
| Nuisance dust | N/A   | 15 mg/m <sup>3</sup> | 15 mg/m <sup>3</sup> | No         | No   | No   |

**8.2 Engineering Controls:**

Maintain air concentrations below occupational exposure standards using ventilation techniques as necessary.

**8.3 Personal Protective Equipment:** The following recommendations are suitable for small, incidental contact with this material. Recommendations for commercial or on-farm application of this chemical may be found on the container label.

|                      |   |
|----------------------|---|
| <b>Eye Contact:</b>  | If splashing can be reasonably anticipated, for instance while pouring the product into another container, wear chemical splash goggles.  |
| <b>Skin Contact:</b> | Where skin contact is possible wear a suitable barrier such as chemical resistant gloves and chemical apron. Preferred glove materials include: butyl rubber, nitrile, polyethylene, and PVC.                 |
| <b>Ingestion:</b>    | Do not allow eating, drinking, tobacco use, and cosmetic application in areas where there is a potential for exposure to this material.   |
| <b>Inhalation:</b>   | A respirator is not normally needed for the incidental handling of this product. For spills or other situations that may generate elevated levels of vapor or dust use a suitable NIOSH certified respirator. |

## 9. PHYSICAL AND CHEMICAL PROPERTIES

|                          |                 |  |         |
|--------------------------|-----------------|--|---------|
| <b>Appearance:</b>       | White granule   | <b>Upper/Lower Explosive Limit:</b>                  | ND      |
| <b>Odor:</b>             | Slight chemical | <b>Vapor Pressure:</b>                               | ND      |
| <b>Odor Threshold:</b>   | ND              | <b>Vapor Density:</b>                                | ND      |
| <b>pH:</b>               | ND              | <b>Relative Density:</b>                             | NA      |
| <b>Melting Point:</b>    | ND              | <b>Solubility:</b>                                   | Soluble |
| <b>Boiling Point:</b>    | ND              | <b>Partition Coefficient, <i>n</i>-Octanol/Water</b> | ND      |
| <b>Flash Point:</b>      | NA              | <b>Auto-Ignition Temperature:</b>                    | ND      |
| <b>Evaporation Rate:</b> | ND              | <b>Decomposition Temperature:</b>                    | ND      |
| <b>Flammability:</b>     | Combustible     | <b>Viscosity:</b>                                    | ND      |

ND=No Data; NA=Not Applicable

## 10. STABILITY AND REACTIVITY

|   |  |
|---|--|
| <b>10.1 Reactivity:</b>                         | Non-reactive under normal conditions.                                  |
| <b>10.2 Chemical Stability:</b>                 | Stable under normal conditions.  |
| <b>10.3 Possibility of Hazardous Reactions:</b> | Will not occur.  |
| <b>10.4 Conditions to Avoid:</b>                | Heat, open flame, sparks, and static electricity.                      |
| <b>10.5 Incompatible Materials:</b>             | Strong oxidizers, strong bases, chlorates, and nitrates.               |
| <b>10.6 Hazardous Decomposition Products:</b>   | Temperatures above 540°F cause release of ammonia and sulfur trioxide. |

## 11. TOXICOLOGICAL INFORMATION

|  |   |
|--|---|
| <b>11.1 Likely Routes of Exposure:</b>         | Overexposure may occur by inhalation, ingestion, and absorption.    |
| <b>11.2 Skin Corrosion/Irritation:</b>         | This material is anticipated to be mildly irritating to the skin.   |
| <b>11.3 Serious Eye Damage/Irritation:</b>     | This material is anticipated to be severely irritating to the eyes. |
| <b>11.4 Respiratory or Skin Sensitization:</b> | This material is not suspected of being a sensitizer.               |
| <b>11.5 Germ Cell Mutagenicity:</b>            | This material is not suspected of being mutagenic.                  |
| <b>11.6 Carcinogenicity:</b>                   | This material is not suspected of being a carcinogen.               |

| Material   | Carcinogen |      |      |
|--|------------|------|------|
|  | NTP        | IARC | OSHA |
| Ammonium sulfate, polyacrylamide and polysaccharide polymers, and antifoam agent | No         | No   | No   |

|                                      |  |
|--------------------------------------|--|
| <b>11.7 Reproductive Toxicity:</b>   | This material is not suspected of being a teratogen.                           |
| <b>11.8 STOT-Single Exposure:</b>    | Overexposure by vapor inhalation is unlikely under normal handling conditions. |
| <b>11.9 STOT-Long Term Exposure:</b> | This material is not linked to long-term exposure effects.                     |
| <b>11.10 Aspiration Hazard:</b>      | This product does not meet the definition of an aspiration hazard.             |
| <b>11.11 Acute Toxicology:</b>       |  |
| Ingestion:                           | Oral LD <sub>50</sub> ND   |
| Skin Contact:                        | Dermal LD <sub>50</sub> ND   |
| Inhalation:                          | Inhalation LC <sub>50</sub> (dust/mist) ND                                     |

**12. ECOLOGICAL INFORMATION**

- 12.1 Ecotoxicity:** Ecotoxicity information is not available. This product is not for use in aquatic settings.
- 12.2 Persistence and Degradability:** No data.
- 12.3 Bioaccumulative Potential:** No data.
- 12.4 Mobility in soil:** No data.

**13. DISPOSAL CONSIDERATIONS**

Rinse containers thoroughly three times and use rinsate according to label instructions. Dispose of product containers, waste containers, and residues according to local, state, and federal regulations. All recovered materials must be packaged, labeled, transported, and disposed or reclaimed in conformance with applicable laws and in conformance with good engineering practices.

**14. TRANSPORT INFORMATION**

- 14.1 DOT/UN ID Number:** NA
- 14.2 DOT/UN Proper Shipping Name:** NA
- 14.3 Transport Hazard Classes:** NA
- 14.4 Packing Group:** NA
- 14.5 Marine Pollutant:** No

**15. REGULATORY INFORMATION****15.1 EPCRA SARA Title III Classifications**
