## Curtail\*

EPA Reg. No. 62719-48

### 2(ee) Recommendation<sup>†</sup>

For Distribution and Use only in the State of Michigan

## Reduced Rates of Curtail Postemergence in Wheat

### ATTENTION

- <sup>†</sup>This recommendation is made as permitted under FIFRA 2(ee) and has not been submitted to or approved by the EPA or state lead pesticide agency.
- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This product bulletin must be in the possession of the user at the time of application.
- Read the label affixed to the container for Curtail before applying. Carefully follow all precautionary statements and applicable use directions.
- Use of Curtail according to this product bulletin is subject to all use precautions and limitations imposed by the label affixed to the container for Curtail.

### Directions for Use

Curtail\* herbicide can be applied postemergence at reduced rates for the control or suppression of certain broadleaf weeds in wheat. Curtail may be applied anytime from the 4-leaf stage to the pre-boot stage in wheat.

#### Broadcast application rates:

Curtail Rate/Acre	Wheat Growth Stage	Maximum Weed Height	Control Expectation
2 pints	4-leaf to Pre-joint	12 inches	Foliar + residual control of ragweeds Foliar control and residual suppression of Canada thistle
1.5 pints	Joint to Pre-boot	6-10 inches	Foliar control of ragweeds Foliar suppression of Canada thistle
1 pint	Joint to Pre-boot	< 6 inches	Foliar control of ragweeds Foliar suppression of Canada thistle

**Always read and follow label recommendations, including applicable use directions, precautions and limitations of all products, whether used alone or in a tank mix.** When tank mixing, follow the most restrictive limitations on the label of each product used. Tank mix applications can result in increased crop injury as compared to either product used alone.
