spray has dried. Do NOT spray animals directly. Hold product 36” above floor and direct toward floor and lower walls at a rate of 10 seconds per 100 sq. ft., making sure that all floor (rugs and carpets), door, and chair surfaces are contacted. Target adjacent cracks and crevices such as behind baseboards and edges of carpets, linoleum planks. Treat higher cracks such as under door jams and window frames, behind pictures and other areas where females may crawl to lay eggs. Treatment may be repeated daily if necessary. Keep areas closed for 1 hour. Open and ventilate before reoccupying. The insect growth regulator in D-FENSE® Nxt works for up to 6 months by inhibiting the development of the immature stages of the fire ant, thereby reducing their population. Once treated, fire ant activity should return to normal.

**DIRECTIONS FOR USE**

It is a violation of federal law to use this product in a manner inconsistent with its labeling. -Remove pets, birds, and cover fish aquariums before spraying. -Get first for stanoeing on an enclosed area prior to use. -Hold container upright and tilt product spray up into air to prevent contact with container or directly spray away from face. Hold can 12-15”s from surface when spraying. -Press button down and spray as directed.

**IN HOSPITALS AND NURSING HOMES** -Do NOT apply this product in hospital rooms while occupied by any patient or in any rooms occupied by the elderly or infants. Apply according to specific directions for pets. **D-FENSE® Nxt** should be treated. Patients should be removed from room prior to treatment. Room should be ventilated for two hours after spraying. Do NOT return patients to room until after ventilation.

**TOP AND EDGE TREATMENTS** Places other than private residences in which food is held, processed, prepared or served, including areas for receiving, storing, packing, canning, bottling, wrapping, freezing, preserving, edible waste storage and enclosed processing systems (mills, dairies, edible oil, syrup) of food/feed. Serving areas where food/feed is exposed and the facility is in operation. -Cover or remove exposed food/feed from the treatment area prior to application. -All food-processing surfaces should be covered during treatment or thoroughly washed before use. -Do not apply directly to food or food handling surfaces. This product is used for food and food handling/processing equipment has been covered or renewed prior to application. -Application over food/feed processing plants, oilseed crops and similar facilities, wash all equipment, brushes, shelving and surfaces which food/feed will contact. -Non-Food/Non-Feed Areas: Examples of non-food/feed areas include garbage rooms, laundries, floor drains (to sewers), entries and vestibules, offices, locker rooms, machine rooms, boiler rooms, meat storage and storage (after packaging, canning or bottling). - All areas that should be treated or entry points which insects may enter should be treated.

**PLAINE** -Do not apply in aircraft cabins. Do not spray on plastic, painted or varnished surfaces or directly onto any electronic equipment such as radios, televisions, computers, etc. Do not use this product in electrical equipment (equipment which is energized in use or in contact) due to possibility of short circuits and shock hazard. Product should only be used when can temperature is above 60°F. If can temperature is below 60°F, store at room temperature until the temperature reaches 60°F.

**CRACK AND CREVICE APPLICATION** -Apply D-FENSE® Nxt Aerosol to the supplied applicator and injection tips. Inject D-FENSE® Nxt Aerosol into cracks and crevices or voids where insects may be harboring. -Living or Breeding. Place injector tip into cracks, crevices, holes and other small openings. -Apply product for one second. For light infestations move injector tip along cracks while treating at the rate of three linear feet per second. For heavy infestations move injector tip along at one linear foot per second. For wall and equipment voids calculate the void’s cubic area and treat at the rate of five to ten seconds per foot. -Apply product to areas where insects may enter should be treated. -Non-Food/Non-Feed Areas: Examples of non-food/feed area includes garbage rooms, laundries, floor drains (to sewers), entries and vestibules, offices, locker rooms, machine rooms, boiler rooms, meat storage and storage (after packaging, canning or bottling). -All areas that should be treated or entry points which insects may enter should be treated.

**WOOD INSECTICIDES**

**CARPETED ANTS, CARPETING BEEs, AND TERMITES** (Subterranean, Formosan & Drywood) -The following applications are not a substitute for mechanical alteration, soil treatment or foundation treatment but may serve as a supplement for controlling active infestations of wood destroying insects including Subterranean, Formosan, and Drywood termites. This product is not recommended as sole protection against termites. For active indoor termite infestations, get a professional inspection. For control inside and outside of structures, apply as general surface, spot, crack and crevice or wall void application. -To kill wood destroying insect infestations in localized above-ground areas of the structure, inject into galleries or voids in damaged wood, or into spaces between damaged wooden structural members. Locate galleries by visual signs of wood destroying insect infestations through the use of mechanical sounding techniques. Where necessary, penetrate the galleries or voids by drilling holes to receive the injector tip. Distribute drill holes in adequately treat the infestation. Application must be made to inaccessible structural voids by drilling and then injecting into the infested void. -For wood destroying insects living in trees, utility poles and fences -D-FENSE® Nxt Insecticide must be used as a spot treatment for control of above-ground termite inside trees, utility poles, fencing and deadening materials and similar structural members. Whenever possible, locate an inferior infested canopy and inject in the appropriate quantities. Re-treat applications as needed to maintain control of re-infestations. 

**Aerial Termites Carbnet Nests in Trees** -Termites nest in trees must be treated with D-FENSE® Nxt Insecticide using an injection applicator. Multiple injection points to varying depths may be necessary. Contain in GCs or other same concealing substrates. Federal regulations prohibit GCs propellants in aerosols.

**STORAGE AND DISPOSAL** 

Do not contaminate water, food or feed by storage or disposal. -STORAGE: Store upright at room temperature. Do not store near heat or direct flame. -STORAGE AND DISPOSAL: Do not puncture or incinerate! Non-refillableRedux® container. Do not reuse or refill this container. If empty: Place in trash or offer for recycling, if available. If partially filled: Call your local solid waste agency for disposal instructions. -PESTICIDE DISPOSAL AND CONTAINER HANDLING: Do not puncture or incinerate! Non-refillableRedux® container. Do not reuse or refill this container. If empty: Place in trash or offer for recycling, if available. If partially filled: Call your local solid waste agency for disposal instructions. -STORAGE: Store upright at room temperature. Do not store near heat or direct flame. -STORAGE AND DISPOSAL: Do not puncture or incinerate! Non-refillableRedux® container. Do not reuse or refill this container. If empty: Place in trash or offer for recycling, if available. If partially filled: Call your local solid waste agency for disposal instructions.

**NOTICE:** Read the entire Directions for Use and Conditions of Sale and Injunction of Warranty and Liability before buying or using this product. If the terms are not acceptable, return the product at once, unopened, and the purchase price will be refunded.
