

Precautionary Statements

Wash hands, face and other affected areas thoroughly after handling. Do not eat, drink or smoke when using this product.

Environmental Hazards

Do not contaminate water sources by cleaning of equipment or disposal of wastewaters.

Approved For Aquatic Use

NET CONTENTS
24 Pounds (10.9 Kilograms)

DECIMAL

**WATER CONDITIONING AGENT
FOR HERBICIDE SPRAYS**

DRY WATER SOLUBLE GRANULES

PRINCIPLE FUNCTIONING AGENTS

Ammonium sulfate, 2-hydroxy-
1,2,3-propanetricarboxylic acid....98.99%
Constituents ineffective
as spray adjuvants.....1.01%
TOTAL.....100.00%

At a rate of 4 pounds per 100 gallons of a spray,
DECIMAL provides 0.24% by weight of ammonium sulfate.
All ingredients are exempt from the requirements
of a tolerance under 40 CFR 180.

**KEEP OUT OF REACH
OF CHILDREN
WARNING**

**HAZARD
STATEMENTS**

May be harmful if swallowed.
May be harmful in contact with skin.
Causes mild skin irritation.
Causes serious eye irritation.

First Aid

Call a poison center or doctor/physician if you feel unwell.

If In Eyes: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do; continue rinsing. Call a poison control center or doctor for treatment advice. If eye irritation persists, get medical advice/attention.

If On Skin or Clothing: If skin irritation occurs, get medical advice/attention. Take off contaminated clothing and wash before reuse. Rinse skin immediately with plenty of soap and water for 15 to 20 minutes. Call a poison control center or doctor for treatment advice.

If Swallowed: Call a poison center or doctor/physician if you feel unwell. Call a poison control center or doctor immediately for treatment advice. Have the person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

If Inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

CA Reg. No. 71058-50006-AA

GENERAL INFORMATION

DECIMAL is a specially formulated blend of reduced rate water conditioning and sequestering agents intended for use with glyphosate and other herbicide spray applications that recommend the use of ammonium sulfate or nitrogen fertilizer as a tank mix additive.

DECIMAL is a spray grade granule that readily goes into solution.

DECIMAL improves weed control by conditioning and acidifying the water.

DECIMAL works to maximize herbicide performance by neutralizing antagonism from water impurities such as iron, calcium and magnesium.

DECIMAL is compatible with all glyphosate formulations and with separately applied drift retardants or nonionic surfactants and is approved for aquatic use.

STORAGE AND DISPOSAL

Prohibitions: Do not contaminate water, food or feed by storage or disposal. Read all precautions of products being handled and follow the most restrictive language for all products to provide the safest work environment.

Storage: Store in a cool, dry place in original unopened bag.

Disposal: Completely empty bag contents into spray tank. Empty bags should be disposed of in a sanitary landfill or by incineration, or by open burning if allowed by state and local regulations. Dispose of contents/bag in accordance with local, state and federal regulations.

DIRECTIONS FOR USE

DECIMAL is intended for use with products registered for agricultural, horticultural, turf, ornamental, industrial and non-crop uses. Read and follow all pesticide label recommendations. Do not use **DECIMAL** if the accompanying tank mix pesticide label prohibits use of water conditioners or acidifying agents.

Always add **DECIMAL** to the spray water as the first component of the mixture. Slowly pour **DECIMAL** into the spray tank at the point of maximum agitation. Continue filling while recirculating until all added products are thoroughly mixed into the spray solution.

Maintain good agitation at all times until the contents of the tank are sprayed. If mixture is allowed to settle, thorough agitation is required before spraying is resumed. For optimum water conditioning, the spray mixture should be used within eight hours.

SUGGESTIONS FOR USE

For ground, air, and aquatic applications, use **DECIMAL** at 3 to 4 pounds per 100 gallons of spray solution. Use the higher rate with hard water conditions. Use the higher rate when tank mixed with glyphosates, or other herbicides, that don't contain a surfactant ingredient.

DECIMAL can be used as a replacement for ammonium sulfate under most conditions. Where extremely hard water conditions exist in conjunction with difficult to control weeds, additional **DECIMAL** or ammonium sulfate may be required.

EMERGENCY ASSISTANCE

For emergency assistance, call CHEMTREC at 800-424-9300.
