## DELARO™ 325 SC Fungicide

For control of tar spot in field corn, field corn grown for seed and popcorn  
EPA Reg. No. 264-1055

### FIFRA 2(ee) Recommendation

#### FOR DISTRIBUTION AND USE ONLY WITHIN THE STATES OF ILLINOIS, INDIANA, IOWA, MINNESOTA, MICHIGAN, OHIO, AND WISCONSIN

**FIFRA Section 2(ee) Recommendation:** This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by the EPA. This product bulletin should be in the possession of the user at the time of application of the product. All applicable directions, restrictions and precautions on the EPA registered label are to be followed.

#### DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its label.

CORN (Field Corn, Field Corn Grown for Seed and Popcorn)		
Disease Controlled	Product Rates (fl oz/A)	Product Instructions
Tar spot ( <i>Phyllachora maydis</i> )	8.0 - 12.0	Apply Delaro 325 SC Fungicide when disease first appears and continue on a 7- to 14-day interval if conditions for disease development persist.  Use the higher rates and shorter intervals when disease pressure is severe.
<b>Application Restrictions:</b> Pre-Harvest Interval (PHI): <b>14 day(s)</b> for grain and fodder. Forage may be harvested the same day of application. Do not apply more than 24 fl oz of Delaro 325 SC Fungicide per acre per year. Do not exceed 0.713 lbs prothioconazole per acre per year, or 0.238 lbs trifloxystrobin per acre per year from all uses, including soil and foliar applications. Application of Delaro 325 SC Fungicide is not recommended at times when corn is under severe environmental stress conditions.
