Delegate™ WG

EPA Reg. No. 62719-541

Foliar Insect Control in Pomegranate

ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read the label affixed to the container for Delegate™ WG insecticide before applying. Carefully follow all precautionary statements and applicable use directions.
- Use of Delegate WG according to this supplemental labeling is subject to all use precautions and limitations imposed by the label affixed to the container for Delegate WG.

Directions for Use

Refer to product label for General Use Precautions, Mixing and Application instructions.

Pests and Application Rates:

Pests	Delegate WG (oz/acre)
leafrollers filbertworm thrips(1)	4 - 7
navel orangeworm	6 - 7

(1) Control of thrips may be improved by addition of an adjuvant to the spray mixture. See Use of Adjuvants section under Mixing.

Specific Use Directions:

Application Timing: Treat when pests appear, or in accordance with local economic thresholds. Consult your Dow AgroSciences representative, extension service specialist, certified crop advisor or your state agricultural experiment station for any additional use recommendations for your area.

Application Rate: The amount of Delegate WG per acre will depend upon tree size and pest pressure. Choose a lower rate in the specified rate range for light infestations and/or small trees and a higher rate for heavy infestations and/or large trees.

Resistance Management: To reduce the potential for resistance development in target pest species, do not make more than 2 consecutive applications of Group 5 insecticides (spinetoram and spinosad). If additional treatments are required after 2 consecutive applications of Group 5 insecticides, rotate to another class of effective insecticides for at least one application. Consult your Dow AgroSciences representative, extension specialist, certified crop advisor, or state agricultural experiment station for information on alternative effective products to use in your area. Do not apply to tropical tree fruits grown in greenhouses and nurseries.

Restrictions:

- Do not apply more than a total of 14 oz of Delegate (0.219 lb ai of spinetoram) per acre per year
- Do not make more than 3 applications per calendar year.
- **Minimum Re-treatment Interval:** Do not make applications less than 4 days apart for thrips, nor less than 7 days apart for all other listed pests.
- **Preharvest Interval:** Do not apply within 1 day of harvest.

Note: This product is highly toxic to bees exposed to direct treatment on blooming crops or weeds. Refer to the Environmental Hazards section of the product label attached to the product container for required protective measures.
