

## FIFRA Section 2(ee) Recommendation

### For Control of Pandemis Leafroller (*Pandemis pyrusana*) on Pome and Stone Fruit in ID, OR, and WA Only

***This recommendation is made as permitted by Section 2(ee) of FIFRA, as amended, and has not been submitted to or approved by the US Environmental Protection Agency.***

All applicable directions, restrictions, and precautions on the EPA-registered labels must be followed. Please contact your Certis USA regional sales manager to determine the specific requirements for FIFRA §2(ee) recommendations in your respective state.

#### **DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**Crops: Apples, Apricots, Cherries, Nectarines, Peaches, Pears, Plums, Pluots, Prunes**

**Application Rate: 0.25 to 2.0 lb/A**

Apply when newly hatched larvae appear and before leaves are rolled or webbing is significant. Continue applying as part of a normal spray program until pest is adequately controlled. Apply when caterpillars are actively feeding. To be effective, Deliver® spray must be deposited at the larval feeding site. Deliver® can be applied by ground or air in water sufficient to ensure complete and even coverage over all leaf surfaces. Thorough and uniform crop coverage is required for adequate insect control. Applications at higher water volumes have demonstrated improved control of targeted pests. For aerial applications, apply in early morning or evening, when air is calm.

This FIFRA Section 2(ee) recommendation contains new or additional directions for use of this product, which may not appear on the package label. Read and observe the precautionary statements plus all other information appearing on the product labels. **For Washington only, this recommendation is not required to be in the possession of the user at the time of pesticide application. For all states other than Washington, this recommendation must be in the possession of the user at the time of pesticide application.**
