Derigo™ Herbicide

For Foliar and Seedhead Suppression of
Unimproved Cool Season Perennial Grasses
in non-crop areas.

EPA Reg. No. 432-1533

FIFRA 2(ee) Recommendation

FOR DISTRIBUTION AND USE ONLY WITHIN THE STATES OF COLORADO, KANSAS, MONTANA, NEBRASKA, AND WYOMING.

FIFRA Section 2(ee) Recommendation: This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by the EPA. This product bulletin should be in the possession of the user at the time of application of the product. All applicable directions, restrictions and precautions on the EPA registered label are to be followed.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its label.

Apply Derigo at 0.5-1 oz per acre for foliar and seedhead suppression of western wheatgrass and crested wheatgrass, and 0.5-1.5 oz per acre for smooth brome.

For optimum performance, application should be made after green-up. If grass stand thinning is observed, delay future applications until full recovery. Tolerance testing on a small area should be done prior to use on species other than western wheatgrass, crested wheatgrass, and smooth brome. Injury symptoms may include temporary discoloration or chlorosis, in particular when cool season grasses are under stress from drought, disease, extreme hot or cold weather.

Do not apply to cool season grasses under stress or severe injury may occur. Length of suppression and injury will depend on species, herbicide rate, surfactant, application timing, and environmental factors.

For MEDICAL And TRANSPORTATION Emergencies ONLY Call 24 Hours A Day 1-800-334-7577.
For PRODUCT USE Information Call 1-866-99BAYER (1-866-992-2937).

*As with any crop-protection product, always read and follow label directions.
