DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not apply this product through any type of irrigation system.

Apply in 10 to 20 gallons if sprayed by ground equipment or in 3 to 5 gallons if sprayed by air.

Repeat applications may be made on 7 day intervals.

Seed Crop	Pest	Rate (pints per acre)	Restrictions
Alfalfa (grown for seed)	Lygus	1 to 1-1/2 (0.9 to 1.4 lbs./a.i.)	<ul style="list-style-type: none">Do not apply more than five (5) applications per year.Do not graze or feed treated alfalfa.Treated alfalfa seed is not to be used for sprouting.Do not apply during the main bloom period if another seed crop within ½ mile is being pollinated by honeybeesRemove alfalfa leafcutting bee shelters during the application. Do not move bees into the treatment area for at least 12 hours after application. Bee kills may result from applications of 1 pt./acre (0.9 lb. a.i./acre) or more to blooming alfalfa seed, even if all precautions are followed.
	Thrips	1/2	

Carrot (grown for seed)	Lygus	1 to 1-1/2	<ul style="list-style-type: none"> • Do not apply more than 3 pints per acre per year. • Allow 48 hours after application before introducing bees for pollination. • During the bloom period, bees must be removed from the field for a minimum of 48 hours after application prior to reintroduction. • Do not apply during the main bloom period if another seed crop within ½ mile is being pollinated by honeybees. Bee kills may result from applications of 1 pt./acre (0.9 lb. a.i./acre) or more to blooming carrot seed, even if all precautions are followed.

GENERAL RESTRICTIONS / PRECAUTIONS

This product is highly toxic to bees exposed to direct treatment or residues on blooming crops or weeds. Do not apply this product or allow to drift to blooming crops or weeds while bees are actively visiting the treatment area. Applications made during the bloom period must coincide with periods of minimum bee activity between late evening and 11 PM. Do not apply if weather conditions favor dew formation the night of application. Bee colonies used for pollination must be removed from the field prior to treatment.

This pesticide is toxic to fish, aquatic invertebrates, and wildlife. Dibrom 8 Emulsive should not be used under this SLN label where impact on listed threatened or endangered species is likely. Contact the National Marine Fisheries Service (NOAA Fisheries) or US Fish & Wildlife Services for information regarding aquatic species listed as threatened or endangered. Consult the federal label for additional restrictions and precautions to protect aquatic organisms.

Use of this product according to this labeling is deemed a non-food, non-feed use by the Idaho Department of Agriculture, and as such is not to be used on fields producing alfalfa or carrots for livestock feed.

- No portion of the alfalfa or carrot seed plant, including but not limited to stubble, hay, forage, seed and seed screenings may be used or distributed for food or feed purposes.
- Do not use alfalfa or carrot seed treated with Dibrom 8 Emulsive for sprouting.
- Producers of alfalfa or carrot seed who use this product must inform in writing, conditioners receiving seed produced on fields treated with this product.
- At the conditioning plant, seed must be labeled or tagged "Not for human or animal consumption". The conditioner must dispose of all seed screenings in such a way that they cannot be distributed or used for food or feed.

Follow all applicable directions, restrictions, Worker Protection Standard requirements and precautions on the EPA-registered label.

This label must be in the possession of the users at the time of pesticide application.
