GENERAL INFORMATION

DriftBuster is an effective, easy to use, adjuvant for deposition improvement and drift retardation in spraying operations. **DriftBuster** can be used in most agricultural desiccant water soluble and wettable powder pesticides, and others in both aerial and ground applications. **DriftBuster** will improve deposition of pesticides in target swath and can retard, but not totally eliminate drift. Proper judgment should be used depending on the type of pesticide, application conditions, and vegetation near the sprayed area.

DIRECTIONS FOR USE + APPLICATION RATE

REFER TO PESTICIDE LABEL FOR SPECIFIC CROP USE AND

APPLICATION RATES. Prior to use, read and follow all directions on this label and on the label of the pesticide being used. The pesticide manufacturer's label for specific usages and restrictions have precedence over **DIRECTIONS FOR USE** referred to on this label. Fill spray tank 1/2 to 3/4 full, add pesticide components, and provide good agitation. Select proper dosage from the dosage chart and add **DriftBuster**. If additional surfactants or spray adjuvants are to be used, they should be added after **DriftBuster**. Continue agitation until tank is full.

Spray Pressure	Nozzle Orientation	DriftBuster per 100 gallons
