### GENERAL INFORMATION

**Droplex Xtra** is a multipurpose spray adjuvant designed to maximize pesticide or fertilizer performance by improving deposition, increasing canopy penetration and reducing spray drift. In addition, **Droplex Xtra** reduces surface tension of spray droplets to improve wetting of leaf surfaces and aid pesticide absorption by the leaves and foliage. The combination of ingredients allows **Droplex Xtra** to enhance the sticking and stop-ping of droplets to surfaces, thus reducing droplet bounce.

**Droplex Xtra** does not adversely affect spray pattern like other drift control adjuvants even when using air assisted type nozzles. To maximize efficacy, use **Droplex Xtra** in conjunction with proper: spray equipment, set-up, boom height, nozzle type, nozzle size and pressure. Good judgment, proper selection and use of spray equipment, and **Droplex Xtra** can help professional applicators maximize pesticide performance.
