### DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**INDOOR USE:** To kill German cockroaches, ants (excluding pharaoh ants), spiders (excluding black widow and brown recluse spiders), fleas, earwigs. Using a hand duster, apply lightly in dry areas where crawling insect pests are found or may hide, including cracks and crevices, along baseboards, around sinks, cabinets, refrigerators and stoves; and in attics and basements. Direct contact with dry dust is required to kill listed insect. In food handling areas, or areas where food or feed products are prepared or stored, apply as a "Crack and Crevice" or a "Spot" treatment. As a crack and crevice treatment apply sparingly into cracks and crevices using equipment designed to place powder into specific locations. Limit spot treatments to walls or floors where pests are suspected of hiding. Individual spot treatments

must not exceed 2 sq. ft. All food or feed items must be removed or covered before treatment. Treat open spaces below floors, above ceilings, within walls, under stairs, underneath and behind equipment or appliances, around pipes, around sinks, in utility closets and around garbage and waste cans. For best results, apply to dry areas. Repeat treatment on dry surfaces as needed to maintain control of problem pests. If treated area becomes moist, sweep or vacuum dust and discard in trash.

**To Kill Fleas Infesting Pet Areas:** Thoroughly treat floor, bedding in and around pet's sleeping quarters. Treat surrounding cracks and crevices, baseboards, furniture, carpeting and wherever fleas are suspected. Apply a thin coat of dust to rugs and carpets. Rake (not sweep) nap back and forth, causing dust to enter rug or carpet. Leave overnight. Repeat applications and vacuum every 3-4 days as necessary for effective flea control. DRYACIDE® CIK will kill live fleas.

**Bed Bugs:** Apply at a minimum rate of 1.6 oz/100 sq. ft. to cracks, crevices and voids associated with mattresses, box springs, bed frames and other furniture where those insects may harbor, travel, breed or enter the room. Treat mattresses, especially tufts, folds and edges. Cover with clean bedding before using. Bed bugs may also harbor in areas of the room away from the bed or furniture. Apply product to wall voids, behind wall hangings, floor molding, window casings, carpet's edge, popcorn ceilings and other cracks, crevices or voids.

**LIVESTOCK HOUSING STRUCTURES:** For use in and around livestock housing structures, swine houses, cattle barns, calf hutches, loafing barns, horse stables and pet kennels. To control ants, spiders, crawling insects, apply dust evenly at a rate of 1 pound per 150 square feet. Apply dust using hand or power duster or other suitable equipment. Apply uniformly to infested areas of walls and floors. Pay particular attention to cracks and crevices, bedding, wall voids and around window and door frames. Applications are permitted when animals are present. Do not apply directly to animal feed or watering equipment. Repeat treatments as necessary to maintain adequate control.

**POULTRY HOUSES:** To control bedbugs, mites, litter beetles (darkling beetles) and hide beetles, apply dust to litter at a rate of 4 pounds per 1000 square feet of surface area. Uniformly cover floors and walls, paying particular attention to cracks and crevices, corners and underneath feed and watering equipment and lines. Avoid contamination of feed and water. Applications can be made up to 75 pounds per 1000 square feet for severe infestations and in moist areas. If litter is greater than 3 inches deep, apply up to an additional 25 pounds per 1000 sq. ft. per additional inch of litter. Applications are permitted mid-flock while birds are present. Litter should be retreated when replaced and before each new batch of poultry is introduced to the facility.

**OUTDOOR USE:** To kill—ants (excluding pharaoh ants), spiders (excluding black widow and brown recluse spiders), earwigs, mites (excluding chiggers and dust mites), and other listed crawling insects.

Using a hand duster or other equipment suitable for application of dusts, dust lightly in areas where insects are found such as windowsills and door frames, around foundations and along ant

trails, edges or areas where insects are active or inhabit such as junctions between walls, floors, concrete pads, overhangs, roofs, ceilings, structural ledges, eaves, harborage areas, around equipment and storage areas. Direct contact with dry dust is required for effective control. Repeat treatment in problem areas as necessary for control.
