DANGER POISON/PELIGRO

FOR CONTROL OF STEM AND BULB NEMATODES IN GARLIC

Expiration date: This label expires and must not be distributed or used in accordance with this SLN registration after December 31, 2025.

ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA registered label.

Directions for Use

DuPont™ Vydate L Insecticide/Nematicide is recommended for use in Washington for the control of stem and bulb nematodes in garlic.

How to Use

At planting, apply 2 to 4 qts per acre (1 to 2 lbs ai/acre) as an in-furrow spray. Application must be incorporated into soil by water or by mechanical means.

For postemergence ground applications: Apply 2 to 4 qts per acre in 20 to 40 gals of water per acre as a 1 to 2 inch band placed on the soil surface at the base of the plants. Application to soil must be incorporated by water or by mechanical means. Make applications at 14-21 day intervals.

Restrictions/Precautions

- Do not apply more than 8 qts. (2 gal) per acre per season (4 lbs ai/acre per season) Dupont™ VYDATE® L per acre per season.
- Do not apply more than 8 applications per acre per growing season.
- Do not apply within 14 days of harvest.
- Do not apply by air.

This product may be applied through irrigation systems. Apply this product only through overhead sprinkler, mini (micro) sprinkler and drip irrigation systems. Refer to the EPA registered label for additional chemigation directions.

For application through pressurized sprinkler systems: Apply 2 to 4 qts per acre. Apply 2 to 4 qts per acre in a minimum of 0.25 to 0.50 acre inch of water to move DuPont™ VYDATE® L into the crop root zone. Make applications at 14-21 day intervals.

WSDA Chemigation Guidance

Application off-site is prohibited. The chemigation application must be continuously observed whenever sensitive areas as defined in WAC 16-202-1002(44) (including but not limited to schools, parks, dwellings, occupied buildings or structures, public roadways, and waters of the state) are at risk of being exposed to drift, runoff, or overspray. In order to minimize the potential for application off-site, WSDA recommends that the product only be applied through low pressure irrigation systems (defined as 5 to 30 pounds/square inch measured at the nozzle) with a nozzle release height no higher than 3 feet above the target crop, and that end guns be disabled throughout the application.

An inspection port or a direct access point is required, and it must be positioned immediately upstream of the irrigation mainline check valve and be of sufficient size to allow visual and manual inspection of the check valve and low pressure drain. The inspection port or access point must have a minimum diameter of four inches, unless an alternative access system is approved by WSDA (WAC 16-202-1012[1]).

The chemigation application tank cannot be placed within 20 feet of and must be down gradient from wellheads or other sensitive areas. Mixing or loading activities cannot occur within 20 feet of the wellhead or other sensitive areas (WAC 16-202-1008[1]).

The operator of the chemigation system must read and understand the WA State Chemigation Rules (WAC 16-202-1001 through WAC 16-202-1024) prior to conducting a chemigation application and must adhere to the requirements contained therein. The rules can be accessed from the Washington State Legislature website (<http://apps.leg.wa.gov/WAC/default.aspx>)

WSDA AQUATIC ADVISORY

This pesticide is toxic to aquatic organisms (fish and invertebrates) and extremely toxic to birds and mammals. DuPont™ VYDATE® L Insecticide/Nematicide should not be used under this SLN label where impact on listed threatened or endangered species is likely. You may refer to the Natural Resources Assessment Section on WSDA's website for additional information related to pesticide use and endangered species protection. Information from EPA about no-spray buffer zones is available on the WSDA website under Endangered Species/Buffers. Pesticide applicators may use the Washington Department of Fish and Wildlife's SalmonScape mapping tool available on their website to determine if listed salmonid species occur in or near a proposed application site. Consult the federal label for additional restrictions and precautions to protect aquatic organisms.

WSDA Container Disposal Guidance

Pesticide containers must be properly cleaned prior to disposal. The best time to clean empty pesticide containers is during mixing and loading, because residue can be difficult to remove after it dries. Triple rinse (or pressure rinse) the pesticide container, empty all pesticide rinse water into the spray tank, and apply to a labeled crop or site. Recycling cleaned containers is the best method of container disposal. Information regarding the recycling of empty and cleaned plastic pesticide containers in Washington is available on the WSDA Waste Pesticide Program web site at <http://agr.wa.gov/wastepesticide>.

Cleaned containers may also be disposed of in a sanitary landfill, if permitted by the county. Burning is not a legal method of container disposal in Washington.

IMPORTANT

BEFORE USING VYDATE L, READ AND CAREFULLY OBSERVE THE CAUTIONARY STATEMENTS AND ALL OTHER INFORMATION APPEARING ON THE PRODUCT LABEL.

This bulletin contains new or supplemental instructions for use of this product which may not appear on package label. Follow the instructions carefully.

This label must be in the possession of the user at the time of pesticide application.

Read the Limitation of Warranty and Liability on the Section 3 Federal product label before buying or using THIS product. If terms are not acceptable, return the unopened package at once to Seller for full refund of purchase price paid. Otherwise, use by Buyer or any other User constitutes acceptance of the terms of the Limitation of Warranty and Liability on the Section 3 Federal product label.
