

## 2(ee) Recommendation

Use information in accordance with Section 2(ee) of FIFRA

### DUPONT™ EXIREL® INSECT CONTROL

EPA Reg. No. 352-859

### FOR CONTROL OF SWEDE MIDGE ON BRASSICA CROPS IN THE STATE OF NEW YORK (Not for sale, sale into, distribution and/or use in Nassau and Suffolk counties of New York State)

This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by EPA.

#### DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling. For any requirements specific to your State or Tribe; consult the agency responsible for pesticide regulation. Do not apply this product in any way that will contact workers or other persons; either directly or through drift. Only protected handlers may be in the area during application.

DuPont™ Exirel® insect control must be used only in accordance with directions on this bulletin or in separately published DuPont labeling.

Apply Exirel® insect control at 13.5-20.5 fl oz/A plus adjuvant (see adjuvant section of the federal label for more details) as a foliar spray using properly calibrated spray equipment. Thorough spray coverage of foliage is essential to achieve best results. Initial application should be made at first sign of adults being present in the field. Use pheromone traps to monitor adult flight. Time applications to the most susceptible insect pest stage, typically at egg hatch and/or newly hatched larvae before swede midge larvae cause leaf damage.

Under heavy pressure, use the highest labeled rate of Exirel® (20.5 fl oz/A). Multiple applications of Exirel® or another effective product that controls swede midge may be needed to maintain populations below damaging levels. Do not make more than two consecutive applications of Exirel® or any other Group 28 product per generation of swede midge (typically a 30-day period). After using Exirel®, the following application to the next generation of swede midge must be with an effective product with a different mode of action (non-Group 28 insecticide). Consult your state cooperative extension service, professional consultants or other qualified authorities to determine appropriate action threshold levels for this pest.

Read and follow the protection of pollinators section of the federal label when using during bloom.

DuPont will not be responsible for losses or damages resulting from the use of this product in any manner not specifically instructed by DuPont. User assumes all risks associated with uses not specified by the label or DuPont 2(ee) instructions.

#### RESTRICTIONS

Do not apply more than 0.4 lbs ai/A of CYAZYPYR® or cyantraniliprole containing products per year.

The minimum retreatment interval is 5 days.

The pre-harvest interval is 1 day.

#### IMPORTANT NOTICE

**BEFORE BUYING OR USING DUPONT PRODUCT(S) COVERED BY THIS BULLETIN, READ THIS BULLETIN, AND THE LABELS FOR ALL PRODUCTS REFERENCED IN THIS BULLETIN, IN THEIR ENTIRETY. FOLLOW ALL APPLICABLE DIRECTIONS, RESTRICTIONS AND PRECAUTIONS.**

It is a violation of federal law to use this or any other pesticide product in a manner inconsistent with its labeling. This bulletin contains supplemental instructions for use of the referenced DuPont product. Follow these instructions carefully. This bulletin should be in the possession of the user at the time of application.

**Read the Limitation of Warranty and Liability on the Section 3 Federal product label before buying or using THIS product. DuPont will not be responsible for losses or damages resulting from the use of this product in any manner not specifically instructed by DuPont. User assumes all risks associated with such uses not specified by the label or DuPont 2(ee) instructions. If terms are not acceptable, return the unopened package at once to Seller for full refund of purchase price paid. Otherwise, use by Buyer or any other User constitutes acceptance of the terms of the Limitation of Warranty and Liability on the Section 3 Federal product label.**
