Planting rice fewer than 60-days following an application of DuPont™ LEADOFF® herbicide at 1.5 oz per acre or 90-days following an application at 2.0 oz per acre may result in unacceptable crop response and reduction in yield. Temporary leaf yellowing and/or retardation of rice growth may occur following application of LEADOFF® herbicide. These effects will be most evident 1-2 weeks after planting rice. Under favorable growing conditions, the crop will quickly recover. Planting a CLEARFIELD variety of rice may reduce initial crop response.
