2(ee) Recommendation
Use information in accordance with Section 2(ee) of FIFRA

DIRECTIONS FOR USE
It is a violation of federal law to use this product in a manner inconsistent with its labeling. Always read this FIFRA 2(ee) bulletin and the entire label on the product container before using this product.

DuPont™ LUMIVIA™ Insecticide Seed Treatment is recommended for the control of billbug species (Sphenophorus spp.) in corn. DuPont™ LUMIVIA™ will provide protection against early season injury to corn from billbugs. Apply LUMIVIA™ at 0.25 to 0.75 milligrams of chlorantraniliprole per seed for control of billbug species, such as southern corn billbug (Sphenophorus callosus) and maize billbug (S. maidis). Do not exceed a maximum of 0.054 pound of chlorantraniliprole per acre regardless of field corn seeding density.

DuPont will not be responsible for losses or damages resulting from the use of this product in any manner not specifically instructed by DuPont. User assumes all risks associated with uses not specified by the label or DuPont 2(ee) instructions.

Restrictions
LUMIVIA™ field corn seed treatment must be used only in accordance with directions on this label or in separate DuPont supplemental labeling that is available as a result of new EPA approvals.

LUMIVIA™ is to be applied to field corn seed only; corn seeds are typically planted at a soil depth of 1.5 to 2 inches. Treated seed exposed on soil surface may be hazardous to aquatic invertebrates. Cover or collect seeds spilled during loading. Store treated seed away from food or feed. Dispose of all excess treated seed by burying seed away from bodies of water.

LUMIVIA™ treated field corn seed may be replanted if an emergency replanting due to crop failure occurs.

Use of LUMIVIA™ as a seed treatment must be communicated to all personnel involved in seasonal insect control applications.

Following the planting of LUMIVIA™ treated seed, total foliar applications for a crop must not exceed a total rate of 0.146 lb chlorantraniliprole per acre. Soil applications of chlorantraniliprole containing products are not permitted.
