Broadcast Application in Christmas Trees (Not for Use or Distribution Within the State of California)

ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read the label affixed to the container for this product before applying. Carefully follow all precautionary statements and applicable use directions.
- Use of this product according to this supplemental labeling is subject to all use precautions and limitations imposed by the label affixed to the product container.

Directions for Use

Read the Product Information, Herbicide Resistance Management, Spray Drift Management, Mixing Directions, and Application Equipment and Application Methods on the label attached to this product's container.

Broadcast apply this product over the established Christmas tree species douglas fir (*Pseudotsuga menziesii*), fir species (*Abies* spp.), and spruce species (*Picea* spp.). Use 1.5 pints of this product per acre in 5 to 30 gallons of water per acre. Apply after trees have completed at least a full growing season since planting or transplanting.

Apply only in the fall after the formation of the final conifer resting buds. Final resting buds must be fully hardened and in the dormant stage. Applying this product at any other time may result in unacceptable injury to the Christmas trees. Avoid spray pattern overlap as injury may occur.

In some areas, 1.5 to 3 pints of this product per acre may be used. Consult your local representative for specific use instructions if rates greater than 1.5 pints per acre are required.

For best results, do not use drift control additives as they may increase injury to Christmas trees.

Precautions and Restrictions:

- **Preharvest Interval:** Do not apply within 1 full year prior to tree harvest.
- Ensure that adequate buffers are maintained to prevent drift onto nearby desirable crops or vegetation.
- Do not add surfactants, additives containing surfactants, or any other additives to this product as severe Christmas tree injury may result.
- Do not use other herbicides in a tank mix with this product as severe Christmas tree injury may occur.
