

ENCOURAGE *CLASSIC*

FERTILIZER TO IMPROVE PLANT VIGOR

2-1-2

GUARANTEED ANALYSIS

Total Nitrogen (N)	2.00%
0.3% Nitrate Nitrogen	
1.7% Urea Nitrogen	
Available Phosphate (P ₂ O ₅)	1.00%
Soluble Potash (K ₂ O)	2.00%
Iron (Fe)	0.40%
0.4% Chelated Iron	
Manganese (Mn)	0.10%
0.10% Chelated Manganese	

Derived from Urea, Monopotassium Phosphate, Potassium Nitrate, Iron DTPA, Manganese EDTA.

ALSO CONTAINS NONPLANT FOOD INGREDIENT(S)

ACTIVE INGREDIENTS:

2.0%	Alcohols, C9-15, ethoxylated (wetting agent)
1.5%	Humic acids derived from leonardite
96.5%	Total inert ingredient (as a nonplant food)

Information regarding the contents and levels of metals in this product is available on the internet at <http://www.aapfco.org/metals.html>

MIX WELL BEFORE USE KEEP OUT OF REACH OF CHILDREN WARNING

Harmful if inhaled. Causes eye irritation. Suspected of damaging fertility or the unborn child.

Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Use personal protective equipment as required. Keep away from flames and hot surfaces. No smoking. Wear protective gloves. Wear eye protection or face protection. Avoid breathing dust/fume/gas/mist/vapours/spray. Use only outdoors or in a well-ventilated area. Wash thoroughly after handling.

FIRST AID

Call a POISON CENTER or doctor/physician if you feel unwell. For Chemical Emergency (spill, leak, fire or accident), call CHEMTREC (800) 424-9300
IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. Call a POISON CENTER or doctor/physician if you feel unwell. **IF IN EYES:** Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do. Continue rinsing. If eye irritation persists: Get medical attention.

In case of fire: Use appropriate media to extinguish.

GENERAL INFORMATION

ENCOURAGE CLASSIC is a 2-1-2 fertilizer with a wetting agent to ensure complete foliar coverage. It also contains humic acid that may aid in the uptake of micro-nutrients. It can be used on agricultural crops, ornamental plants and commercial turf to stimulate plant growth. CLASSIC can be used as a one-time application or as part of a season-long fertility program.

DIRECTIONS FOR USE

Prior to use, read all the directions on this label and on the label of the tank mix partners being used with this product. Thoroughly clean all mixing and spray application equipment prior to and following each use. Unless directed otherwise by mixing instructions on the label of product to be tank mixed with CLASSIC, add desired amount of water to the tank and begin agitation. Add CLASSIC and continue agitation. If desired, add liquid fertilizer or other tank mix partners. CLASSIC can be applied as a foliar spray by air, ground or chemigation. CLASSIC can be tank mixed with most pesticides and nutrients.

MIXING DIRECTIONS

(COMMERCIAL USE ONLY)

AGRICULTURE:

Spray with sufficient solution to wet foliage, but not to the point of runoff. (Row crops: 10 fl. oz. to 2 quarts per acre) Apply 2–3 times per growing season. Plants need to be just past the seedling stage and true leaves should be present - about 25% coverage of the ground before the first application. Second application is usually just before flowering, or just before the onset of the reproductive stage of the crop. The third application would be early in the grain fill or fruit/vegetable sizing stage. (Tree and Vine crops: 1–2 quarts per acre) Apply 2–3 times per growing season when leaves are present.

NURSERY, GREENHOUSE, ORNAMENTAL AND LANDSCAPE:

(Succulent plants: Mix 64 fl.oz. in 100 gallons water) (Woody plants: Mix 96 fl. oz. in 100 gallons water) Spray with sufficient solution to wet foliage, but not to the point of runoff. Apply every 14–21 days or as needed. Plants need to be just past the seedling stage - about 25% coverage of the ground before the first application. Second application is usually just before flowering, or just before the onset of the reproductive stage of the plant. The third application would be early in the seed fill or fruit/vegetable sizing stage.

GOLF COURSE SUPERINTENDENTS, LANDSCAPERS, GROWERS AND NURSERY OPERATORS*:

SOD, FAIRWAYS, LAWNS AND GREENS: Mix 3 fl. oz. per 1 gallon of water. Apply 1 gallon solution per 1000 square feet (or 40 gallons solution per acre) every 10–14 days or as needed.

* In Virginia, use only on 1. newly established turf areas from sod or seed during the first growing season; 2. turf areas being repaired or renovated; 3. turf areas where soil tests performed within the past 3 years indicate a nutrient deficiency. * DO NOT apply near water, storm drains, or drainage ditches. Do not apply if heavy rain is expected. Apply this product only to your lawn/garden, and sweep any product that lands on the driveway, sidewalk, or street, back onto your lawn/garden.

APPLICATION PRECAUTIONS

DO NOT mix with or add other surfactants. Applicator should spray and evaluate response for 48 hours prior to widespread usage. May cause staining on handler's apparel and hard surfaces. Application of certain nutrients during high temperatures may result in staining or cosmetic injury of fruit or rind. Test all new tank mixes before widespread use. Do not apply directly to seed. To ensure thorough mixing, it is suggested that you recirculate mini tanks and bulk tanks or shake containers before using. Do not mix CLASSIC with undiluted tank mix partners until you have "jar tested" in a separate container using the proportionate amount of CLASSIC to make sure the products are compatible. Agitate and let stand 10 minutes. Settling that does not disperse indicates an incompatible mixture. Do not use on crops or plants that are sensitive to humic acid or surfactants.

STORAGE AND DISPOSAL

STORAGE: Keep away from open flames, hot surfaces and sources of ignition. Store in a cool, dry, well-ventilated place out of direct sunlight. Store locked up. Store in original tightly closed container away from children, animals, foods, feeds and seeds. **PRODUCT AND CONTAINER DISPOSAL:** Do not allow this material to drain into sewers/water supplies. Empty containers or liners may retain some product residues. Triple rinse (or equivalent) during mixing and loading. Dispose of contents in accordance with local/regional/national/international regulations.

NOTICE OF WARRANTY

CONDITIONS OF SALE-LIMITED WARRANTY AND LIMITATIONS OF LIABILITY AND REMEDIES: To be read prior to using this product. The directions should be followed carefully together with good application practice. Failure to do so may cause injury to crops, animals, man or the environment. Extraordinary or unusual weather conditions may affect product performance and/or crop injury which are beyond the control of Oro Agri, Inc. (the "Company") or seller. The Company warrants that this product conforms to the chemical description on the label and is reasonably fit for the purpose referred to in the Directions For Use. The Company makes no other warranties or representations of any kind, express or implied, concerning the product, including no implied warranty of merchantability or fitness for any particular purpose, and no such warranty shall be implied by law. The exclusive remedy against the Company for any cause of action relating to the handling or use of this product shall be limited to, at Company's election, ONE of the following: 1. Refund of the purchase price paid by buyer or user for product bought. 2. Replacement of the product used. To the extent allowed by law, the Company shall not be liable and any and all claims against the Company are waived for special, indirect, incidental, or consequential damages or expense of any nature, including, but not limited to, loss of profits or income. The company/seller offer this product and the buyer/user accept it, subject to the foregoing conditions of sale and limitation of warranty, liability and remedies.
